...Beauty is but a promise of happiness...

3V Cleansing Milk with Sweet Almond Oil 250ml

for characteristics of active ingredients, see page 108, 112

€ 14.60 cad.

ACTION

- * Removes make-up and traces of impurities
- Nourishing, Softening, Regenerating and Decongesting for irritated, sensitive skin; specifically for skin prone to couperose or rosacea
- Soothing, protects blood vessels
- Retains the natural PH, leaving the skin amazingly velvety and bright

How to use

Apply the Milk to the face when dry and gently massage, using a circular motion.

Remove with cold water or with a cotton pad.

WITH APPLICATOR

Apply the Milk to the face and gently massage, using the sponge pad accessory in a circular motion.

When to use

Before any facial treatment or cleansing. At night whenever you need to remove make-up and traces of impurities or in the morning to revitalise the skin, leaving it feeling nice and healthy and ready for make-up.

4v

Dual-Phase Eye and Lip Make-Up Remover with Extract of Avena Sativa 150ml

for characteristics of active ingredients, see page 97, 104

€ 14.60 cad.

ACTION

- * Removes make-up from the eyes and lips
- Effective, gentle cleansing of the area around the eyes, also for sensitive eyes
- Decongesting: reduces redness and tiredness
- Protects and hydrates the eye contour

How to use

Shake well before use to ensure that the dual-phase ingredients are thoroughly and evenly mixed.

Apply a generous amount of the product on to

a cotton pad.

Remove make-up with a gentle motion outwards.

When to use

Whenever you need to remove make-up from around the eyes and the lips.

6V Balancing Toner with Hyaluronic Acid, Witch Hazel and Blueberry 250ml

for characteristics of active ingredients, see page 95, 104, 106

€ 12.30 cad.

ACTION

- Gentle toning lotion to rehydrate the skin after cleansing
- Restores balance to the hydrolipid film of the skin after cleansing
- Protective and Decongesting
- Antioxidising

How to use

After cleansing, apply the toner to a cotton pad and gently wipe the face, neck and chest area, dabbing the skin so that the product is absorbed properly to leave the skin nicely toned.

WITH APPLICATOR

Apply the Toner to the face using the spray attachment provided, then gently dab with your fingers or a cotton pad.

When to use

During the cleansing phase, before any facial treatment or cleansing.

Morning or night on thoroughly cleansed skin.

U

FACIAL

Intensive Hydrating Treatment with Hyaluronic Acid, Vitamin A and Avocado Oil 250ml - UV filter

for characteristics of active ingredients, see page 95, 107, 112

€ 22.60 cad.

ACTION

- * Restores and maintains the hydrolipid film
- Deep and long-lasting hydration: prevents the appearance of the first expression lines
- * **RETINOL:** (Vitamin A) for a strong Anti-oxidizing action
- Its softening and nourishing properties give an immediate sensation of wellness
- ° Contains UV filters
- * Suitable for extremely dehydrated skin and cold climates

Biospherix 9X FACE Cream - Hyaluronic Filler With 9X Low Molecular Weight Cross-Linked Hyaluronic Acid Biospheres 50 ml - 1.69 Fl.oz.

€ 43.80 cad.

ACTION

- Filler Anti-Aging Moisturizing
- ° A natural, super soft cream, enriched with valuable low molecular weight Hyaluronic Acid and an innovative patented molecule, of biotechnological cross-linked Hyaluronic Acid, with filler effect.

Thanks to their low molecular weight, 9X Acid Hyaluronic Biospheres more easily retain water. This significantly increases skin hydration by weaving into wrinkles and increasing their volume by as much as 9 times, thus encouraging the filling of the skin and the "raising from the inside" of the wrinkle. For instantly visible, effective anti-wrinkle and hydrating action.

Hyaluronic Acid is a fundamental component of our connective tissues.

It ensures that our skin remains resistant and retains its

If hyaluronic acid levels are low, the skin can become weak, leading to the formation of wrinkles and imperfections. Concentration in our tissues tends to decrease with age.

HOW TO APPLY

18 Must

After cleansing, apply the cream to the face, neck and décolleté in the morning and at night, massaging gently until totally

Specifically recommended for the eye area and lips too.

65v FACE Cream with Snail Secretion - 50% Concentration

50 ml - 1.69 Fl.oz

for characteristics of active ingredients, see page 99

€ 54.40 cad

ACTION

- Anti-Aging Nourishing Rejuvenating Restructuring: Stretch Effect - Moisturizing
- ° A rich cream with a super soft, evanescent texture, which, thanks to its high content of valuable snail secretion (up to 50%, comprising Collagen - Elastin - Allantoin -Glycolic Acid and Vitamins) brings effective antiwrinkle action, regenerating and purifying the skin tissue deep down. Brings tone, elasticity, smoothness and brightness to the skin.

NOURISHING ACTION

Around 80% of the skin is made of elastin and collagen fibres. substances which should be integrated using cosmetic products which contain them. For this reason, the mucous produced by snails, used as an active ingredient in creams, promises to make tissues more elastic and toned, with a consequent healthy effect on wrinkles, which become less visible.

REGENERATING ACTION

Regenerating action is ensured by the allantoin, which stimulates the production of elastin and collagen fibres, allowing tissue repair and the softening of wrinkles. Allantoin can actually remove most signs of scarring, skin blemishes, and burns and also slows down the skin ageing process.

EXFOLIATING ACTION

Thanks to the presence of glycolic acid, a cream containing snail secretion allows delicate peeling of the skin surface layer, useful in reducing skin blemishes.

PURIFYING ACTION

Peptides and Glycolic Acid, contained in snail secretion, are the main bringers of purifying action. These substances prevent the accumulation of impurities or, if already present, can repel them. For this reason, a cosmetic product containing snail secretion can be helpful in tackling acne.

HYDRATING ACTION

Thanks to the proteins present, snail secretion helps to oxygenate tissues and to hydrate, for healthy feeling skin.

ANTI-OXIDANT ACTION

Vitamin C and Vitamin E reduce inflammation and protect against free radicals.

HOW TO APPLY

After cleansing, apply the cream to the face, neck and décolleté in the morning and at night, massaging gently until totally

For fresher, brighter, restructured skin, with stretching effect.

When to use

Use daily, in the morning and at night.

Concentrated FACE Serum - Relaxis - Botolike Instant effect 30 ml - 1.01 Fl.oz.

for characteristics of active ingredients, see page 111

€ 33.90 cad.

ACTION

- ° Anti-Aging
- ° Toning and Wrinkle Smoothing
- ° Lifting Effect

The main active ingredient in the Relaxis Botolike Face Concentrate is a naturally occurring peptide with a marked effect on muscle relaxation and release of neurotransmitters.

INSTANT EFFECT

A soft gel rich in natural active ingredients, that prevent and soften expression wrinkles, promoting the relaxation of the epidermis. The treated area relaxes, restoring beauty and harmony to the face.

How to apply

Apply a suitable amount of product the face, neck and décolleté, massaging gently until totally absorbed. An excellent base for make-up.

When to use

Use daily, in the morning or at night.

To intensify and extend the effects of the treatment, use together with Relaxis Cream - BotoLike 67V: the Serum in the morning and the Cream at night.

€ 39.70 cad.

ACTION

- ° Anti-Aging
- ° Toning and Wrinkle Smoothing
- Lifting Effect

The main active ingredient in the Relaxis Botolike Face Cream and Serum is a naturally occurring peptide with a marked effect on muscle relaxation and release of neurotransmitters.

LONG LASTING EFFECT

A soft cream rich in natural active ingredients, that prevent and soften expression wrinkles, promoting the relaxation of skin muscles. The treated area relaxes, restoring beauty and harmony to the face.

How to apply

Apply a suitable amount of product the face, neck and décolleté, massaging gently until totally absorbed.

When to use

Use daily, in the morning or at night.

For instant effect, use the Cream in combination with Relaxis Serum 66V: the Serum in the morning and the Cream at night.

Purifying Dermoprotective Skin Mask with White Clay, Achillea Extract and Essential Oils of Tea Tree and Rosemary 250ml

for characteristics of active ingredients, see page 94, 98, 106

€ 25.00 cad.

ACTION

- * For oily, impure skin which is prone to acne.
- A rich, dense mask with functional ingredients which work in synergy to deliver dermopurifying, soothing, protective and refreshing action. The skin is left smoother and more luminous, with its natural balance restored.

How to use

After cleansing as usual, spread over the face and neck in an even layer, without massaging. Leave to rest for 10-15 minutes, then remove with a damp sponge.

When to use

Once or twice a week depending on skin condition.

69v

Hydrating, Nourishing Mask for Sensitive and Delicate Skin, with Sodium DNA, Aloe Vera Extract and a special hydrating polymer 250ml

for characteristics of active ingredients, see page 98, 111

€ 22.60 cad.

ACTION

Ideal for dry, delicate, under-nourished skin. A unique extra-delicate, hydrating formula. Sensitive skin is left instantly radiant and beautiful. Prevents skin redness and dryness. Special active ingredients rejuvenate and restore skin wellbeing. Marked anti-aging action leaves the skin more elastic, luminous, smooth and hydrated..

How to use

Leave-on mask. After cleansing, apply a thin layer of product to the face, neck and décolleté and leave to rest for 10-15 minutes (this allows the skin to absorb the mask). Remove any excess product with a damp sponge.

When to use

Once or twice a week depending on skin condition.

Purifying Cleansing Gel with NMF, Essential Oils of Tea Tree and Rosemary, Achillea Extract and Zinc Surfactant.

for characteristics of active ingredients, see page 94, 106, 112, 113

€ 22.40 cad.

ACTION

- ° For impure, acne-prone, toxin-affected skin.
- ° Hydrating, dermoprotective.
- * Removes makeup and pollution residues.
- * Frees the pores of impurities, leaving skin luminous and hydrated.
- Dermofunctional properties: anti-inflammatory, astringent, removes redness and excess sebum.

How to use

Apply gel to wet skin and massage carefully using circular movements. Remove using fresh water or a dampened cotton wool pad.

WITH APPLICATOR

Apply gel to the face and massage carefully with the soft brush tool, using circular movements.

When to use

For use as a cleanser as part of a purifying skin treatment. In the evening, whenever you want to remove makeup or pollution residues, or in the morning,

to revitalise and create a pleasant sensation of wellbeing before applying makeup.

80v

Enzymatic Peel with Proteases and Allantoin 100ml

for characteristics of active ingredients, see page 97, 109

€ 21.20 cad.

ACTION

A gel mask peel to rejuvenate the skin. Helps reduce skin blemishes, preparing the skin for cosmetic treatments and bringing instant luminosity.

For use as a preparatory treatment for the skin on the face, helps counteract the appearance of lines and wrinkles.

Suitable for all skin types.

Helps keep the skin young by respecting its natural physiology.

How to use

After cleansing and toning thoroughly, apply a thin layer of the Enzymatic Peel to the treatment area using your finger or a brush.

The keratolytic/exfoliating action encourages the absorption of subsequent products applied.

Leave to rest for a maximum of 5-10 minutes.

Remove all traces of the product using a damp sponge.

When to use

Once or twice a week depending on skin characteristics.

82v

Mandelic Acid Peel

20% Concentration

Exfoliating - Purifying
100ml

for characteristics of active ingredients, see page 96

€ 25.00 cad.

ACTION

A concentrated aqueous solution of mandelic acid, with outstanding smoothing effect. Recommended for anti-aging treatments and skin blemishes, for gentle but effective keratolytic action and skin depigmentation. Also suitable for sensitive skin.

How to use

Apply mandelic acid to the skin weekly using the dropper provided. Spread in slow, circular motions using a cotton wool ball. Resting times: sensitive skin: 10-15 minutes, thick or resistant skin 20-25 minutes. Should you feel excessive tingling or your skin become red, suspend the treatment and immediately dab with STOP 88V.

When to use

Once a week depending on skin condition. For hypersensitive skin – once every two weeks.

Micellar Water - Cleanser and Make-up Remover with Cucumber Juice and Distilled Waters of Cornflower and Elderberry

for characteristics of active ingredients, see page 101, 103, 111

€ 17.80 cad.

ACTION

- * A multifunction product which cleanses and treats the skin on the face in a single motion.
- ° For cleansed, make-up free skin which is purified, hydrated, refreshed and bright.
- ° Does not alter skin pH.
- Cleanser and Make-up Remover.
- Makes the skin hydrated, toned, soft and smooth; soothes any redness.
- * Detoxifying, calming action.

How to use

Apply the product to a cotton wool ball and carefully cleanse the face. Do not rinse.

When to use

Before any facial treatment or cleansing. At night whenever you need to remove make-up and traces of impurities or in the morning to revitalise the skin, leaving it feeling nice and healthy and ready for make-up.

84_v

2in1 Toning Milk - Cleanser and Make-up Remover With Distilled Waters of Orange Flower and Rose 250ml

for characteristics of active ingredients, see page 96, 106

€ 15.10 cad.

ACTION

- ° A 2 in 1 product which combines the cleansing action of milk with a refreshing, rebalancing toner.
- * The rich, creamy texture removes make-up residue and impurities, with respect for the natural skin hydration level.
- For deep-down cleaning and toning in just one application.

How to use

Apply a small amount of product to the palm of your hand and massage carefully over the face, neck and décolleté, avoiding the eye area. Use morning and evening. Rinse using warm water.

When to use

Before any facial treatment or cleansing.

At night whenever you need to remove make-up and traces of impurities or in the morning to revitalise the skin, leaving it feeling nice and healthy and ready for make-up.

with 95% Snail Slime

€ 33.60 cad.

ACTION

- * Anti-aging Nourishing Moisturising.
- A rich cream with a very soft and evanescent texture which, thanks to the very high content of the precious snail slime (95%), naturally rich in Collagen - Elastin -Allantoin - Glycolic Acid and Vitamins, helps to counteract and prevent wrinkles and nourish the skin of the face, giving it tone, elasticity, softness and brightness.

NOURISHING EFFECT: About 80% of the skin is made up of elastin and collagen fibres, substances that should be integrated by using cosmetics that contain them. For this reason, the mucus secreted by the snail, used as an active ingredient in a cream, ensures to make the tissues more elastic and toned, resulting in a beneficial effect on wrinkles, which become less visible.

REGENERATING EFFECT: This is due to the effects of the Allantoin, which stimulates the production of elastin and collagen fibres, which allow tissue repair and the reduction of wrinkles. The Allantoin, in fact, allows marks deriving from scars, skin spots and burns to be eliminated and slow down the skin aging process.

EXFOLIATING EFFECT: Thanks to the presence of glycolic acid, a cream containing snail slime allows gentle peeling of the superficial layer of the skin, proving to be useful for skin spots to be reduced. PURIFYING EFFECT: The Peptides and Glycolic Acid contained in the snail slime are mainly responsible for this effect. In fact, these substances prevent the accumulation of impurities or, if present, they manage to eliminate them. For this reason, a cosmetic based on the snail secretion is useful in combating acne.

MOISTURISING EFFECT: Thanks to the proteins present, the snail slime helps tissue oxygenation and hydration, thereby conveying the sensation of healthy skin.

ANTIOXIDANT EFFECT: Vitamin C and Vitamin E reduce inflammation and counteract the effect of free radicals.

HOW TO USE

After cleansing, apply the cream on the face, neck and neckline with a gentle massage, until fully absorbed.

The skin will be fresh, bright and restored: tensor effect.

When to use

Use daily, in the morning and at night.

Active Mix Peel Exfoliating and Moisturizing Enriched Formula 47%

with Glycolic Acid, Mandelic Acid, A.H.A. (Lactic Acid, Citric Acid, Malic Acid), Phytic Acid, Phosphatidylcholine, DMAE and Tea Extract 50ml

€ 34.00 cad.

ACTION

- Cosmetic product containing a pool of acids (Glycolic, Mandelic, Phytic and Lactic acids) with excellent smoothing and moisturising properties, buffered at pH 2.5-3, without being harsh on the skin.
- Thanks to the substances it contains (Lipoic Acid and DMAE), it helps promote epidermal renewal, leaving the skin looking more even and toned, minimising blemishes and enlarged pores.
- Thanks to its active ingredients (Lipoic Acid, Phosphatidylcholine and DMAE), it prevents ageing and leaves the skin looking more radiant and even.

How to use

Apply a thin layer of the product onto the face, neck and chest after cleansing. Let it set for 10-13 minutes, then remove thoroughly with the special STOP 88V Solution. Should you feel excessive tingling or your skin become red, suspend the treatment and immediately dab with STOP 88V. Warnings: Avoid contact with the eyes and mucous membrane.

After treatment, avoid sun exposure.

When to use

Two to four times a month, depending on skin condition and type.

STOP A.H.A. Buffer Solution for exfoliating products with Hypericum and Malva Extracts

for characteristics of active ingredients, see page 104, 105

€ 17.50 cad.

ACTION

- Buffer solution used to block the exfoliating product's action after the setting time.
- * It is also used in case of sudden burning sensations or excess reddening of the skin.

How to use

After applying the exfoliating product, dab the relative a cotton pad soaked in Stop A.H.A.

When to use

Always after applying the exfoliating product.

89V Blemish Lightening Concentrated Gel* with Arbutin, Liquorice Extract and Vitamin C 15ml

for characteristics of active ingredients, see page 102, 112

€ 28.40 cad.

BeneXere®

Anti-Aging Filler DAY CREAM 50ml - 100ml

for characteristics of active ingredients, see page 95, 99, 107, 109, 112, 113

fi1 € 29.90 cad. - fi2 € 38.00 cad.

A cream with a thick, rich texture, it's toning action fights the signs of aging typical of mature skin, for an anti-aging treatment.

Nourishes and hydrates the epidermis, restoring tone, firmness and brightness to the skin.

HOW TO USE

apply the Cream and massage until fully absorbed, paying special attention to the areas with typical expression lines. An excellent base for make-up.

WHEN TO USE

Every morning after cleansing.

ACTIVE INGREDIENTS

- **BoNT PEPTIDE**
- PRO-VITAMIN B₅
- ZANTHALENE®
- VITAMIN E
- SHEA BUTTER
- ARGAN OIL
- HYALURONIC ACID WITH HIGH MOLECULAR WEIGHT

Anti-Aging FILLER SERUM 30ml

for characteristics of active ingredients, see page 95, 99, 101, 113

€ 31.90 cad.

Fast-absorbing serum with a light and hydrating texture. An ideal complement to the cream for a complete anti-aging treatment, that can also be used on its own, especially in the summer.

Enriched with a blend of active ingredients to protect the dermal matrix, this is a precious ally in the fight against skin aging.

How to use

Apply the Serum and massage until fully absorbed, paying special attention to the areas with typical expression lines.

An excellent base for make-up

WHEN TO USE

Every night, after cleansing.

ACTIVE INGREDIENTS

- **BoNT PEPTIDE**
- ZANTHALENE®
- ANTI-AGING ENERGISING MINERAL COMPLEX
- HYALURONIC ACID WITH HIGH MOLECULAR WEIGHT

FACIALFILLER RANGE

fi4

ANTI-AGING eye contour filler gel

for characteristics of active ingredients, see page 95, 99, 105, 112, 113

€ 20.80 cad.

ACTION

Light and cooling gel that gives immediate relief to the eye contour area. The toning and lifting action, typical of the effective ingredients used, restores a bright and fresh look.

Draining effect

HOW TO LISE

Apply the product to the area around the eye and massage until fully absorbed, paying special attention to the areas with typical expression lines. An excellent base for make-up.

WHEN TO USE

Every morning after cleansing or whenever your eyes need a refreshing boost.

ACTIVE INGREDIENTS

- **BONT PEPTIDE**
- ° ZANTHALENE®
- LIPOPEPTIDE
- TETRAPEPTIDE
- HYALURONIC ACID WITH HIGH MOLECULAR WEIGHT

fi5

ANTI-AGING filler concentrate 8 x 2ml vials

for characteristics of active ingredients, see page 99, 105, 109, 113

€ 32.00 cad.

ACTION

Fluid concentrate with a lifting effect, suitable for skin showing signs of aging, actively reduces the depth of wrinkles on the face and neck, naturally relaxing muscle tension.

How to use

Apply the contents of one vial to the whole of the face and chest area, lightly massaging until fully absorbed.

ACTIVE INGREDIENTS

- BoNT PEPTIDE,
- ° LIPOPEPTIDE,
- ° PRO-VITAMIN B5
- ZANTHALENE®

When to use

Once or twice weekly.

fi6

ANTI-AGING filler mask

6 x 25ml bags

for characteristics of active ingredients, see page 94, 101

€ 57.90 cad.

ACTION

Fleece veil mask consisting of a blend of ingredients for a visibly hydrating, rejuvenating and toning action. Both the vial and mask, when used together, provide a complete and effective treatment against aging.

HOW TO USE

Remove the pre-shaped fleece veil from the bag and gently apply it to the cleansed and toned face. Leave for 15 to 20 minutes, then remove the veil and gently dab any remaining product into the skin so that all the active principles are absorbed.

WITH APPLICATOR

After applying the veil, use the micro-ion or Ultrasound 3 KHz function for 2 - 3 minutes to intensify the absorption of the active ingredients.

ACTIVE INGREDIENTS

- MINERAL BLEND
- ANTI-AGING ENERGISING
- GLYCOLIC ACID

WHEN TO USE

Once or twice weekly.

CLEANSING and EXFOLIATION (scrub)

ANTI-AGING FILLER SERUM (fi3) Apply anti-aging filler serum until fully absorbed

PHASE 3 (RECOMMENDED)

To intensify the action of the specific products that will follow in the treatment, the use of professional R.F. (Radio Frequency) is recommended.

ANTI-AGING FILLER MASK (fi6)

RICH IN ACTIVE INGREDIENTS, it relaxes and tones, reducing signs of tiredness.

Creates an anti-aging effect.

Leave for 15 to 20 minutes, then remove the veil and gently dab any remaining product into the skin so that all the active ingredients are absorbed.

ANTI-AGING FILLER CONCENTRATE (fi5)

Apply the contents of one vial to the whole of the FACE and CHEST AREA, lightly massaging until fully absorbed.

ANTI-AGING FILLER CREAM (fi2)

Apply the cream and massage until fully absorbed, PAYING special attention to the areas with typical expression lines.

EYE CONTOUR GEL (fi4)

Apply to the areas around the eyes and lips; lightly massage until fully absorbed.

FILLER CREAM - Anti-aging - Day Apply to the face every morning after thorough cleansing.

EYE CONTOUR FILLER GEL - Anti-aging After thorough cleansing, apply every night to the area around the eye.

FILLER CONCENTRATE - Anti-aging

After applying anti-aging eye contour filler gel, apply the contents of one vial to the whole of the face and chest area: every night or every other night, depending on the depth of the imperfections.

FILLER SERUM - Anti-Aging Apply to the face every morning aftér applying Anti-aging Filler day cream.

STAMINAL ANTI-AGE is a range of anti-aging treatments for the face, neck and chest area, based on Stem Cells extracted from UTTWILER SPÄTLAUBER APPLES.

The synergising action of the products' ingredients brings vital energy to the skin cells and rejuvenates the tissue.

Recent scientific research has highlighted the effectiveness of using plant stem cells in cosmetics.

In fact, it has been proven that on contact with the skin, these cells encourage important skin regeneration processes, stimulating the cells in our body whose renewal function slows down over time.

WHAT ARE Stem Cells?

Every cell in a living organism is specialized and carries out a specific function.

Stem cells are "primitive" cells, not yet specialised to carry out a specific process; they are therefore capable of transforming and generating new tissue, rejuvenating and repairing the cells of our body which, with the passing of time, have lost their rejuvenating function.

WHY ARE THE Stem Cells OF UTTWILER SPÄTLAUBER APPLES AN EFFICIENT ANTI-AGING INGREDIENT?

UTTWILER SPÄTLAUBER APPLES, originally from Switzerland, have one particular characteristic which is different from other varieties of apple: they don't "wither" because they contain large numbers of longevity stem cells which protect the fruit and guarantee its longevity. The extract of this particular variety of apple stimulates skin rejuvenation, activating and revitalising the skin stem cells and increasing their lifespan.

Clinical tests have confirmed the visible reduction of wrinkles and the improved firmness of skin tissue.

The revolutionary discovery has allowed us to create Staminal Anti-Age, a range of anti-aging treatments for the face, neck and chest are. An extraordinary response to the problem of skin aging and the formation of wrinkles. The ingredients contained in the Staminal Anti-Age products intensify the properties of the stem cell extract from Uttwiler Spätlauber apples, with a synergizing action which brings vital energy to the skin cells and regenerates the tissue.

The formation of wrinkles is slowed down and signs of aging are reduced. The result is younger looking, radiant skin which is toned and firm.

Stress from the sun, pollution and tiredness and the need for REGENERATING treatment.

Less firm skin, which needs to be REDENSIFIED

LIFTING effect, firming the skin.

WHEN TO USE

One cycle of bi-weekly, in-salon sessions are sufficient for an intensive regenerating skin treatment, followed by the use of self-treatment products at home.

Facial scrub concentrate based on stem cell extract with quartz powder 100ml

for characteristics of active ingredients, see page 100, 109

€ 16.00 cad.

ACTION

A formula rich in active ingredients and quartz powder. Perfect for deep cleansing of the face and ideal for use before any skin treatment to promote optimal product absorption. Smooths the skin and refines the epidermis, leaving you with radiant, glowing skin.

How to use

Apply a fine layer of product to the face, neck and chest area. Massage gently in a circular motion, from the centre of the face

outwards. Remove with a small damp sponge or with plenty of warm water.

WITH APPLICATOR

After the recommended time, for a more intensive action, remove the product using ultrasound (25KHz.) with a wand.

WHEN TO USE

Once or twice weekly.

\$12 ANTI-AGING facial serum Hyaluronic Acid and Stem Cells 30ml

for characteristics of active ingredients, see page 95, 100

€ 29.30 cad.

ACTION

The Anti-Aging Facial Serum with Plant Stem Cells from Uttwiler Spätlauber Apples actively combats the signs of aging and the formation of wrinkles thanks to its deep energising and antioxidising action.

Hyaluronic acid provides intense hydration, regenerating and toning the skin, leaving it firmer and more elastic.

How to use

After the **st1** Scrub, apply a few drops of **st2** Serum to the face and dab until fully absorbed.

For use before and after the st3 Mask.

WHEN TO USE

Every night, after cleansing.

Elasticising and rejuvenating mask, with a complex with a fucose base

for characteristics of active ingredients, see page 103

€ 19.00 cad.

ACTION

Ideal for all skin types, it tones the epidermis thanks to its oils and active ingredients which slow down the skin aging process. A rich complex with a fucose base which has an intense, long-lasting hydrating action.

How to use

After using st2 Serum, apply the st3 Mask to the face, neck and chest area, avoiding the areas around the eyes and lips.

Leave to act for 15/20 minutes, then remove with a small damp sponge.

WITH APPLICATOR

After applying the veil, use the Micro-Ion or Ultrasound 3 KHz function for 2 or 3 minutes to intensify the absorption of the active ingredients.

WHEN TO USE

Once or twice weekly.

ANTI-AGING facial cream with plant stem cells extracted from UTTWILER SPÄTLAUBER APPLES and vitamin E, complex with a fucose base 100ml

for characteristics of active ingredients, see page 100, 103, 112

€ 21.20 cad.

ACTION

The Anti-Aging Facial Cream with plant stem cells from Uttwiler Spätlauber apples and vitamin E actively combats the signs of aging and the formation of wrinkles thanks to its deep energising action which reduces free radical damage.

A rich complex with a fucose base which has an intense, long-lasting hydrating action.

The skin is left redensified, toned and elasticised, leaving your skin looking younger and your features more relaxed.

How to use

Apply after using st2 serum to the face, neck and chest area, massaging lightly until absorbed.

WHEN TO USE

Every morning after cleansing.

STE

UTTWILER SPÄTLAUBER Apple

S15 ANTI-AGING FACIAL DAY cream with plant stem cells extracted from UTTWILER SPÄTLAUBER APPLES, and vitamin E, complex with a fucose base 50ml

for characteristics of active ingredients, see page 100, 103, 112

€ 30.30 cad.

ACTION

The Anti-Aging Facial Day Cream with plant stem cells from Uttwiler Spätlauber apples and vitamin E actively combats the signs of aging and the formation of wrinkles thanks to its deep energising action which reduces free radical damage. A rich complex with a fucose base which has an intense, long-lasting hydrating action. The skin is left redensified, toned and elasticized, leaving your skin looking younger and your features more relaxed.

How to use

Apply daily to the face, neck and chest area, massaging lightly until absorbed.

S16 ANTI-AGING EYE CONTOUR Gel with plant stem cells extracted from UTTWILER SPÄTLAUBER APPLES, with Hyaluronic Acid and Lingonberry Oil 15ml

for characteristics of active ingredients, see page 95, 100, 106

€ 19.30 cad.

ACTION

Anti-Aging Eye Contour Gel.

Quickly absorbed and rich in precious ingredients including plant stem cells from Uttwiler Spätlauber apples and lingonberry oil for an intense anti-aging and antioxidising action.

The active substances stimulate cell activity, reducing puffiness around the eye area and smoothing wrinkles to reduce signs of tiredness.

How to use

Apply morning and night after cleansing, lightly dabbing from the inside corner of the eye to the temples.

STAMINAL TREATMENT METHOD

PHASE T

st1 FACIAL SCRUB with Quartz Powder

HOW TO USE: apply a fine layer of product to the face, neck and chest area. Massage gently in a circular motion, from the centre of the face outwards. Remove with a small damp sponge or with plenty of warm water.

PHASE 2 (RECOMMENDED)

RADIO FREQUENCY

To intensify the action of the specific products that will follow in the treatment, the use of professional **R.F.** (Radio Frequency) is recommended.

PHASE 3

st2 ANTI-AGING FACIAL SERUM with Concentrate based on Stem Cells and Hyaluronic Acid

HOW TO USE: after using the **st1** scrub apply a few drops of serum to the face, dabbing until fully absorbed.

PHASE 4

st3 ELASTICISING AND REJUVENATING MASK with Complex with a Fucose Base

HOW TO USE: apply the **st3** mask to the face, neck and chest area, avoiding the areas around the eyes and lips, leave to act for 15/20 minutes then remove with a small damp sponge.

PHASE 5

st2 ANTI-AGING FACIAL SERUM with Concentrate based on Stem Cells and Hyaluronic

HOW TO USE: after using the **st3**, mask, apply a few drops of **st2** serum to the face, dabbing until fully absorbed.

PHASE 6

st4 ANTI-AGING FACIAL CREAM based on Stem Cells, Vitamin E and Complex with a Fucose Base HOW TO USE: apply after treatment to the face, neck and chest area, massaging lightly until absorbed.

HYDRATION

015 RELAXING ESSENTIAL OIL

Apply a few drops to the hands, warm them up, have the client gently inhale, then perform a short massage (palpation) of the neck and shoulders.

4 v DUAL-PHASE EYE MAKE-UP REMOVER

Shake the bottle well before use to ensure that the dual-phase ingredients are evenly mixed, then apply a generous amount of product to a cotton pad to remove make-up from the eyes and lips.

3v - 200v CLEANSING MILK

Apply the product to the face, neck and chest area, massaging in a circular motion, then remove with cold water or a damp sponge.

WITH APPLICATOR

Apply the product to the face, neck and chest area, then use the brushing function (a brush with a sponge attachment) and massage. Rinse off with a small damp sponge.

EXFOLIANT WITH SALICYLIC ACID

Leaving the skin damp, apply a thin layer of exfoliant to the face, neck and chest area. Gently massage in a circular motion from the bottom upwards and leave for 4 to 6 minutes for normal or combination skins. For sensitive and/or acne-prone skin, it is advisable to apply the exfoliant without massaging and to leave it for 4 to 6 minutes. Remove with a small damp sponge.

WITH APPLICATOR

Apply the product to the face, neck and chest area, then use the brushing function (a brush with soft bristles) and massage. Rinse off with a small damp sponge.

O12 ESSENTIAL OIL DEEP CLEANSING

Apply 3 to 4 drops to the T-zone of the face and dab for a few seconds until fully absorbed.

WITH APPLICATOR

To help open up the pores for subsequent "squeezing", a 10-minute (approx.) steamer session is recommended. Once the skin is hydrated, it is advisable to use an ultrasonic spatula to remove any impurities on the surface or deeper into the skin.

6v + 202v TONER

Generously soak a cotton pad and apply to the face and neck until absorbed, leaving the skin toned.

WITH APPLICATOR

Apply the toner to the face using the spray attachment provided, then gently dab with your fingers.

O11 SOOTHING ESSENTIAL OIL

For a decongesting action, apply 5 to 6 drops to the face, neck and chest area and dab for a few seconds until fully absorbed.

16V HYDRATING MASK

Apply a generous amount of product to the face, neck and chest area. Leave for 15/20 minutes. Remove with warm water.

WITH APPLICATOR

Spread a generous amount of mask to the face, neck and chest area and massage with the H.F. function for around 3/5 min. to intensify the effect of the product, stimulate microcirculation and ensure full absorption.

Leave for 10/15 minutes, then rinse off with warm water.

Depending on the condition of the skin, finish off the treatment

23v TREATMENT FOR IMPURE AND/OR ACNE-PRONE SKIN

Apply the product to the face, neck and chest area and massage until fully absorbed.

12v intensive hydrating treatment FOR DEHYDRATED SKIN

Apply the product to the face, neck and chest area and massage until fully absorbed.

55v treatment for hypersensitive skin

Apply the product to the face, neck and chest area and massage until fully absorbed.

Or

ANTI-AGING CREAM TREATMENT FOR AGING SKIN

Apply the product to the face, neck and chest area and massage until fully absorbed.

FACIAL CLEANSING

FOR ALL SKIN TYPES

- estimated duration of treatment 60 min.
- effect: skin purifying, brightening, oxygenating, hydrating
- Recommended number of sessions: once or twice monthly for normal and combination skins; 2 to 3 times monthly for impure, dull-looking or acne-prone skin

TREATMENT METHODS

FACIAL HYDRATION

015 RELAXING ESSENTIAL OIL

Apply a few drops to the hands, warm them up, have the client gently inhale, then perform a short massage (palpation) of the neck and shoulders.

4V DUAL-PHASE EYE MAKE-UP REMOVER

Shake the bottle well before use to ensure that the dual-phase ingredients are evenly mixed, then apply a generous amount of product to a cotton pad to remove make-up from the eyes and lips.

3v - 200v CLEANSING MILK

Apply the product to the face, neck and chest area, massaging in a circular motion, then remove with cold water or a damp sponge.

60v EXFOLIANT WITH SALICYLIC ACID

Apply a thin layer of exfoliant to the face, neck and chest area, keeping the skin on the face damp. Gently massage in a circular motion from the bottom upwards and leave for 4 to 6 minutes for normal or combination skins. For sensitive and/or acne-prone skin, it is advisable to apply the exfoliant without massaging and to leave it for 4 to 6 minutes.

Remove with a small damp sponge.

WITH APPLICATOR

Apply the product to the face, neck and chest area, then use the brushing function (a brush with soft bristles) and massage. Rinse off with a small damp sponge..

6v - 202v TONER

Generously soak a cotton pad and apply to the face and neck until absorbed, leaving the skin toned.

WITH APPLICATOR

Apply the toner to the face using the spray attachment provided, then gently dab with your fingers.

09 LYMPH DRAINAGE ESSENTIAL OIL Apply 3/4 drops to the lymph nodes. Massage lightly.

14v ultra-hydrating and elasticising concentrate

Apply the product to the face, neck and chest area and lightly massage into the skin.

WITH APPLICATOR

Apply the product to the face, neck and chest area and for greater penetration, use the Ultrasonic function or, alternatively, the Micro-lon function.

To ensure deep hydration and to intensify the beneficial effect of the Ultra-Hydrating Concentrate, before applying the product, perform a brief Radio Frequency treatment in the relevant areas for around 10 minutes, then apply the Concentrate.

16V HYDRATING MASK

Apply a generous amount of product to the face, neck and chest area. Leave for 15/20 minutes. Remove with warm water.

WITH APPLICATOR Spread a generous amount of mask to the face, neck and chest area and massage with the H.F. function for around 3/5 min. to intensify the effect of the product, stimulate microcirculation and ensure full absorption.

Leave for 10/15 minutes, then rinse off with warm water.

Or

69V MASK FOR SENSITIVE AND DELICATE SKIN HYDRATING AND NOURISHING

Leave-on mask. After cleansing, apply a thin layer of product to the face, neck and décolleté and leave to rest for 10-15 minutes (this allows the skin to absorb the mask). Remove any excess product with a damp sponge.

12v Intensive hydrating treatment

Apply a generous amount of product to the face, neck and chest area. Gently massage.

WITH APPLICATOR

Apply a generous amount of product to the face, neck and chest area. Select the Air Massage or Thermo function and massage slowly along the lymphatic pathways for 5/10 minutes.

For sensitive, couperose and/or acne-prone skin, only use Air Massage

FOR DEHYDRATED SKIN

- estimated duration of treatment 40-50 min.
- hydrating, elastisizing, smoothing effect.
- With Radio Frequency: Toning and Plumping Up
- Recommended number of sessions: Twice weekly depending on the extent of the problem

86V ACE CREAM WITH SNAIL SECRETION - 95%

NTI-AGING

015 RELAXING ESSENTIAL OIL

Apply a few drops to the hands, warm them up, have the client gently inhale, then perform a short massage (palpation) of the neck and shoulders.

DUAL-PHASE EYE MAKE-UP REMOVER

Shake the bottle well before use to ensure that the dual-phase ingredients are evenly mixed, then apply a generous amount of product to a cotton pad to remove make-up from the eyes and lips.

3v - 200v CLEANSING MILK

Apply the product to the face, neck and décolleté, massage using circular movements, then remove using fresh water or a damp sponge.

WITH APPLICATOR

Apply the product to the face, neck and chest area, then use the brushing function (a brush with a sponge attachment) and massage. Rinse off with a small damp sponge.

6y - 202y TONER

Generously soak a cotton pad and apply to the face and neck until absorbed, leaving the skin toned.

WITH APPLICATOR

Apply the toner to the face using the spray attachment provided, then gently dab with your fingers.

80v ENZYMATIC PEEL

Apply a fine layer to the face, neck and chest area, Leave to act for around 5/10 min., then remove with a small damp sponge.

WITH APPLICATOR

Before applying the 46v Mask product, a Radio Frequency treatment to the relevant areas, for around 15/20 minutes, is recommended. Radio Frequency encourages the natural production of Hyaluronic Acid to increase deep hydration, and the subsequent natural formation of Collagen and Elastin, intensifying the beneficial effect of the Mask's active ingredients.

46V ANTI-AGING MASK

Apply a generous amount of product to the face, neck and chest area. Leave for 15/20 minutes. Remove with warm water.

18v eye contour rejuvenating cream

Apply the product to the area around the eye, lightly massaging from the inside outwards, in a circular motion.

59v anti-aging day cream

Apply the product to the face, neck and chest area until fully absorbed.

Or

64V BIOSPHERIX 9X FACE CREAM – HYALURONIC FILLER

Apply the cream to the face, neck and décolleté in the morning and at night, massaging gently until totally absorbed.

ANTI-AGING TREATMENT

- estimated duration of treatment: 50 min. estimated duration of the treatment with Radio Frequency: 65/70 minutes
- effect: hydrating, nourishing, anti-oxidizing, plumping, lifting, rejuvenating
- Recommended number of sessions: 1 to 2 sessions weekly for 3/4 weeks

Z FACIAL

Rapid Action Fatty-deposit Reducing Cream with complex of Caffeine, Pineapple and Centella Asiatica 500ml/250ml

for characteristics of active ingredients, see page 98, 100

6C € 30.50 cad. - 7C € 23.90 cad.

ACTION

Cream to combat imperfections caused by fat and cellulite PINEAPPLE: astringent, improves circulation and slows down the occurrence of oedema and water retention.

CAFFEINE: stimulates cell metabolism, helping to reduce fat

tissue. Thermogenic.

CENTELLA: facilitates synthesis of collagen and elastin, toning

and elasticising the connective tissue.

Quickly absorbed.

How to use

Apply the product to the relevant areas of the body, massage using the preferred technique until fully absorbed.

WITH APPLICATOR

Apply the cream to the relevant areas and use one of the following technologies to intensify the specific action of the product:

- Infrared
- Ultrasound
- Physio-sauna (Heat therapy)
- Press-massage
- Electrolipolysis

To complete the following treatments:

- Radio Frequency
- ° Endodermal

WHEN TO USE

In-Salon: Twice weekly as part of a reduction/shaping

Self-treatment: daily application to the areas requiring treatment, massaging lightly until fully absorbed.

Anti-Cellulite Cream with Draining Action, with Centella Asiatica, Butcher's Broom and Orange Blossom 500ml/250ml

for characteristics of active ingredients, see page 100, 102, 110

8C € 31.30 cad. - 9C € 25.50 cad.

ACTION

A formula with extensive action against blemishes caused by oedematous cellulite; contains active plant ingredients extracted from the petals of orange blossom, which are rich in flavonoids, combined with a blend of plant extracts including Centella and Butcher's Broom for draining the tissue.

CENTELLA: facilitates synthesis of collagen and elastin, toning and elasticising the connective tissue

BUTCHER'S BROOM: Decongesting, Calming, Soothing and acts against Water Retention

ORANGE BLOSSOM: Draining and stimulating for microcirculation.

How to use

Apply the product to the relevant areas of the body, massage using the preferred technique until fully absorbed.

WITH APPLICATOR

Apply the cream to the relevant areas and use one of the following technologies to intensify the specific action of the product:

- Infrared
- Ultrasound
- Physio-sauna (Heat therapy)
- ° Press-massage
- Electrolipolysis

To complete the following treatments:

- Radio Frequency
- Endodermal.

When to use

In-Salon: Twice weekly as part of a Draining/Reduction package Self-treatment: daily application to the areas requiring treatment, massaging lightly until fully absorbed.

40 Toning, Firming Cream with Elastin and 15c Yeast Extract 500ml/250ml

for characteristics of active ingredients, see page 102, 105

14C € 27.90 cad. - **15C** € 22.40 cad.

ACTION

- ° Firms and repairs skin tissue
- ° Improves skin elasticity, for a softer and smoother look
- ° Combats free radicals and the formation of stretch marks

YEAST: combats aging and tissue slackening **ELASTIN:** strengthens and hydrates collagen fibres.

How to use

Apply the product generously to the relevant areas of the body, massage using the preferred technique until fully absorbed.

WITH APPLICATOR

After Radio Frequency treatment, apply the Toning Cream to intensify the specific action of the product.

When to use

In-Salon: Twice weekly as part of a Toning/Firming package
Self-treatment: daily application to the areas requiring treatment, massaging lightly until fully absorbed.

Refreshing Fluid for Tired Legs, with Centella Asiatica, Butcher's Broom and Refreshing Agents 250ml

for characteristics of active ingredients, see page 100, 110

€ 18.30 cad.

ACTION

Refreshing fluid that provides lightness with a draining action. Relieves swelling in the legs.

BUTCHER'S BROOM: Decongesting, Calming and Soothing, it acts

against water retention.

CENTELLA: facilitates synthesis of collagen and elastin,

toning and elasticising the connective tissue.

How to use

The spray format makes it easier to apply, for an immediate sensation of wellness and freshness at any time of day.

Spray directly on to the legs or over tights.

Leave to absorb naturally.

WHEN TO USE

Whenever immediate relief from the feeling of heaviness and swelling in the legs is required.

220 Warming, Slimming Cream with Pineapple and Ivy Extract, Capsicum Oleoresin and Ginkgo Biloba 500ml

for characteristics of active ingredients, see page 98, 100, 102, 104

€ 30.70 cad.

ACTION

- Thermogenic cream for professional use, with intensive action against blemishes caused by Localised, Resistant and predominantly Adipose Cellulite.
- Stimulates microcirculation and accelerates local cell metabolism, facilitating the natural absorption of reducing active ingredients.

GINKGO BILOBA: Protects blood vessels, tones, improves the

vascular function of microcirculation.

PINEAPPLE: Astringent, ideal for the skin, improves circulation

and slows down the occurrence of oedema and

water retention.

CAPSICUM OLEORESIN: a powerful local stimulant, derived from the

Chilli Pepper, with warming, anti-inflammatory

and analgesic action.

IVY: Rejuvenating, Soothing, Toning.

How to use

Apply the product generously to the blemished areas of the body, massaging lightly until fully absorbed. Avoid sensitive areas (e.g. underarms and groin). The thermogenic effect varies from person to person. Wrap the treated areas in a transparent film to maximise the thermogenic action.

Combined with Mud, Algae and Clay, its action is increased. After applying the Thermogenic Cream as described above, apply the Mud, Algae or Clay and wrap in high-density polyethylene; complete the treatment.

Wash your hands after applying the product.

WITH APPLICATOR

Combined with Pressotherapy.

Apply the product as described above, with or without the transparent film.

The client should wear TNT Panta Presso leggings Proceed with the treatment.

WHEN TO USE

In-Salon: twice weekly as part of Reduction and Anti-Cellulite treatments

At home: every other day or every day for

At home: every other day or every day for those suffering from a high number of blemishes.

Smooth-flowing emollient, suitable for any use. Ideal for body and facial massages.

ALMOND OIL: Nourishing, Softening, Hydrating and elasticizing. Excellent decongestant for irritated and sensitive skin.

How to use

Apply the product generously to the whole of the body, massage using the preferred technique until fully absorbed. Also recommended for use during Hot Stone Massage treatments.

WHEN TO USE

Whenever a massage is required.

416 Single-Use Wrap Bandages Moistened with a Soft Gel and with Dead Sea Salt for a Draining Effect 250ml in a sachet

for characteristics of active ingredients, see page 110

€ 17.40 cad.

ACTION

Single-use wrap bandages moistened with a soft gel, containing 23% Dead Sea Salt, which, in spite of the high salt concentration, is transparent and practically odourless, with a Draining Effect. Dead Sea salt, unlike any other sea salt IN THE WORLD, has a high concentration of minerals, including Magnesium and Potassium, which are extremely beneficial to numerous physiological mechanisms, first and foremost cell membrane exchanges (sodium-potassium pump).

Saturated with Dead Sea salt, it maintains the right concentration of salt, ensuring that the product constantly retains this important characteristic.

The 41C Salt Gel Wrap Bandage also contains an iodine compound which, enhancing the effect of the Dead Sea salt, makes the product much more suitable for treatments to combat imperfections caused by cellulite and fat deposits.

The 41C Salt Gel Wrap Bandage, thanks to the specific characteristics described above, is ideal for treating individuals suffering from water retention (also localised), orange-peel skin or swelling in the legs, improving circulation and thus guaranteeing a notable draining effect.

Also suitable for pregnant or breast-feeding women.

How to use

Apply from the feet/ankles to the inner thigh, abdomen, than wrap in a sheet of high-density polyethylene or Panta Presso for 30 minutes.

At the end of the application, the gel remaining in the sachet, around 30ml of product, is massaged on to the relevant area in order to intensify the effects of the treatment.

Lightly massage using the preferred technique until fully absorbed.

WITH APPLICATOR

Apply the wrap bandages as described above and then, to intensify the specific action of the product, use one of the following technologies:

- ° Press-massage
- ° Ultrasound
- Electrolipolysis and Electromagnetic Waves.

WHEN TO USE

In-Salon: twice weekly as part of a Slimming/Reduction treatment package.

At home: once weekly for maintenance, twice weekly for intensive treatment.

420 Single-Use Wrap Bandages Moistened with Soft Gel with Phosphatidylcholine, Essential Oils of Juniper and Mint and Extract of Gin seng for a Slimming Effect 250ml in a sachet

for characteristics of active ingredients, see page 103, 110

€ 17.40 cad.

ACTION

Suitable for combating imperfections caused by cellulite and/or localised fat deposits, SLIMMING.

The product's key active ingredient is Phosphatidylcholine, also used in the past in cosmetic medicine for mesotherapy treatments (injections) in order to break down localised fat deposits (cellulite). Phosphatidylcholine is in fact a component of Soybean Lecithin (widely recommended, by no coincidence, as a supplement for sufferers of high cholesterol or triglycerides, i.e. a high concentration of fat in the blood), yielding excellent results thanks to its particular molecular structure which makes it a molecule capable of bonding with water and lipids at the same time (hydrophilic and lipophilic). This enormous advantage gives the 42 C Gel Wrap Bandage two fundamental intrinsic abilities:

1. to easily pass through the skin barrier (facilitated penetrability) and, as a direct consequence, to act as a "carrier" for other active ingredients, both lipophilic and hydrophilic, which have limited penetrability.

2. to act naturally as a fat solubiliser.

To increase the effectiveness of the 42C Gel Wrap Bandage, natural plant ingredients have been added, widely renowned for their tissue toning and stimulating effect, and including: Juniper, Ginseng, Mint.

GINSENG HYDROGLYCERIN OIL, Toning and stimulating effect.

JUNIPER ESSENTIAL OIL, Toning and stimulating effect.

MINT ESSENTIAL OIL Refreshing.

How to use

Apply from the feet/ankles to the inner thigh, abdomen, than wrap in a sheet of high-density polyethylene or Panta Presso for 30 minutes.

At the end of the application, the gel remaining in the sachet, around 30ml of product, is massaged on to the relevant area in order to intensify the effects of the treatment.

Lightly massage using the preferred technique until fully absorbed.

WITH APPLICATOR

Apply the wrap bandages as described above and then, to intensify the specific action of the product, use one of the following technologies:

- Press-massage
- Heat therapy
- Ultrasound
- ^o Electrolipolysis and Electromagnetic Waves.

WHEN TO USE

In-Salon: twice weekly as part of a slimming/reduction treatment package.

At home: once weekly for maintenance, twice weekly for intensive treatment.

PLUS Benexere Single-Use Gel wrap bandages 41c - 42c - 49c

Moistened bandages

One pack contains 2 bandages measuring 10m long x 10cm wide, advantages:

- ° a complete treatment from the ankle to the groin for both legs
- ° quick application, one bandage per leg
- ° stretchable and perfectly suitable for any leg shape
- ° containing Soft Gel, no liquid: NO dripping
- ° contains around 250ml gel: the bandage is completely moist, even on the inside. At the end of the application, the gel remaining in the sachet, around 30ml, is massaged on to the relevant area in order to intensify the treatment provided with the bandage.
- ° packed in aluminium sachets, lined inside with a protective film:
 - Resistant
- No oxidising
- * The fragrance of the cosmetic product remains unaltered
- Full protection against light for correct storage of the cosmetic.

Each sachet contains 2 bandages and is sufficient for the complete treatment of 2 legs + abdomen.

BODY z

Aloe

64 MLISTEI

GEL LENTIVO SCONINIO GEL LINTIVO SCONINIO GEL LINTI

44¢ Soothing Gel with Aloe Vera

for characteristics of active ingredients, see page 98

€ 20.60 cad.

ACTION

- ° Soothing and Softening
- Hydrating
- ° Calming, Decongesting
- ^o Eliminates redness, irritation and cools the skin
- Suitable as a treatment to follow:
- ° Hair removal with Waxing and Electrocoagulation with Needle
- ° IPL
- ° Laser
- ° Radio Frequency
- ° Excellent as aftersun or aftershave.

How to use

Apply the Gel to the relevant part of the skin, dab or massage lightly until fully absorbed.

WITH APPLICATOR

Suitable after the following treatments:

- ° IPL
- ° Laser
- ° Radio Frequency
- ^o Electrocoagulation with Needle.

WHEN TO USE

After hair-removal treatment, apply morning and night to the treated areas until any redness or irritation has completely disappeared.

For any redness or irritation in general (e.g. exposure to the sun), apply the product morning and night until the redness or irritation has completely disappeared.

Due to its versatility it can be used in numerous instances, whenever a soothing and decongesting treatment is required.

CELLU L

450 Massage Oil with Phosphatidylcholine, with Extract of Ginseng and Essential Oil of Juniper and Mint 250ml

for characteristics of active ingredients, see page 103, 110

€ 24.30 cad.

ACTION

Massage oil with plant extract for Intensive Fat Deposits and Cellulite, enriched with Phosphatidylcholine and essential oils of Juniper, Mint and extract of Ginseng. Suitable for combating skin blemishes caused by cellulite and/or localised fat deposits. Smooth-flowing emollient, suitable for any use.

PHOSPHATIDYLCHOLINE, helps to disintegrate localised fat deposits, acting as a natural fat solubiliser.

GINSENG HYDROGLYCERIN OIL, toning and stimulating effect.

JUNIPER ESSENTIAL OIL, toning and stimulating effect.

MINT ESSENTIAL OIL Refreshing:

Note: any deposit found at the bottom of the bottle is due to the totally natural origin of the product and to the richness of its active ingredients. Shake well before use.

WHEN TO USE

Whenever a massage is required.

46¢ Cellulite Cream with Caffeine and Sangre de Drago Extracts and Guarana and Ginseng Plant Extracts 220ml

for characteristics of active ingredients, see page 100, 104, 110, 111

€ 20.20 cad.

ACTION

A formula with extensive action against all blemishes caused by first to fourth stage cellulite.

CAFFEINE: suitable for reduction treatments and active against blemishes caused by cellulite. This is due to its lipolytic properties, which trigger a mechanism to break down the fat contained in the cells.

> Stimulates skin microcirculation and helps to eliminate excess liquid, making the skin firmer. This results in a reduction in thickness of the orange-peel tissue, in the bulges and fat deposits, and tones the skin.

SANGRE DE DRAGO EXTRACT: Healing, antiseptic and anti-inflammatory properties.

Helps to prevent and reduce stretch marks.

GUARANA EXTRACT: High lipolytic activity, essentially due to the high caffeine content of the seeds.

GINSENG EXTRACT: Hydrating, toning and stimulating effect.

How to use

Apply the product to the relevant areas of the body, massage using the preferred technique until fully absorbed.

WITH APPLICATOR

Apply the cream to the relevant areas and use one of the following technologies to intensify the specific action of the product:

- ° Infrared
- Ultrasound
- ° Physio-sauna (Heat therapy)
- ° Press-massage
- ° Electrolipolysis

To complete the following treatments:

- Radio Frequency
- ° Endodermal.

WHEN TO USE

In-Salon: Twice weekly as part of an Anti-Cellulite/Reduction package Self-treatment: daily application to the areas requiring treatment, massaging lightly until fully absorbed.

Gel Cream for Fat Deposits on the Stomach and Hips with Phosphatidylcholine, with Extract of Ginseng and Essential Oil of Juniper and Mint 220ml

for characteristics of active ingredients, see page 103, 110

€ 24.30 cad

ACTION

An innovative cream, rich in Phosphatidylcholine, essential oils of Juniper and Mint and extract of Ginseng. Suitable for combating skin imperfections caused by localised fat deposits and cellulite Slimmina Effect.

Phosphatidylcholine is a molecule extracted from soya which has been acknowledged and used for many years. Its physical and chemical properties are similar to the natural lipids found in the outermost layer of the skin; thus, when applied locally, it blends in perfectly, penetrating and acting as a carrier for the other active ingredients.

This enormous advantage has three fundamental intrinsic abilities:

- to easily pass through the skin barrier (facilitated penetrability) and, as a direct consequence, to act as a "carrier" for other active ingredients, both lipophilic and hydrophilic, which have limited penetrability.
- to act naturally as a fat solubiliser.
- To combat aging, restoring balance to the outer layer of the epidermis (cell turnover), subjected to stressful conditions.

GINSENG EXTRACT: hydrating, toning and stimulating effect.

ESSENTIAL OIL OF JUNIPER: stimulating, toning effect.

Anti-inflammatory, Antiseptic, with an anti-infective and antibacterial action, for treating oedema, lymphatic stasis, water retention.

ESSENTIAL OIL OF MINT: toning, stimulating, refreshing, regenerating and anti-inflammatory properties.

How to use

Apply the product to the relevant areas of the body, massage using the preferred technique until fully absorbed.

WITH APPLICATOR

Apply the cream to the relevant areas and use one of the following technologies to intensify the specific action of the product:

- Infrared
- Ultrasound
- Physio-sauna (Heat therapy)
- Press-massage
- Electrolipolysis

To complete the following treatments:

- Radio Frequency
- Endodermal

WHEN TO USE

In-Salon: Twice weekly as part of an Anti-Cellulite/Reduction package. Self-treatment: daily application to the areas requiring treatment, massaging lightly until fully absorbed.

48¢ Intensive Serum with Phosphatidylcholine, with Glycyrrhetinic Acid, Caffeine, Aescin and Extract of Centella Asiatica 100ml

for characteristics of active ingredients, see page 94, 100, 102, 103

€ 25.50 cad.

ACTION

A soft gel consisting of an innovative formula that harnesses the synergy of precious active ingredients to combat skin blemishes caused by cellulite and/or fat deposits.

The synergising action of the **phosphatidylcholine**, a natural carrier, with the alucosamine sulphate, a precursor of hyaluronic acid, with the aescin, caffeine and extract of Centella, constitutes a valid ally in treating cellulite and/or fat deposits.

Its physical and chemical properties are similar to the natural lipids found in the outermost layer of the skin; thus, when applied locally, it blends in perfectly, penetrating and acting as a carrier for the other active ingredients.

It is a major component of cell membranes, giving them the appropriate fluidity, thus benefitting the exchange mechanisms of osmosis.

To combat aging, restoring balance to the outer layer of the epidermis (cell turnover), subjected to stressful conditions.

CAFFEINE:

suitable for reduction treatments and active against blemishes caused by cellulite. Stimulates skin microcirculation and helps to eliminate excess fluid, making the skin firmer. This results in a reduction in thickness of the orange-peel tissue, in the bulges and fat deposits, and toned skin.

GLYCYRRHETINIC ACID: extracted from liquorice, with remarkable soothing and anti-inflammatory properties.

AESCIN:

an active ingredient contained in the seed of the horse-chestnut with anti-edematous, antiinflammatory and antioxidising properties, for combating blemishes caused by cellulite. Protects the blood vessels and reinforces their connective tissue.

Counteracts the effect of free radicals. Aescin helps to regenerate microcirculation, thus limiting capillary fragility.

CENTELLA ASIATICA: used in the treatment of both cellulite and skin slackening. Counteracts the loss of elasticity and the formation of wrinkles and stretch marks. A powerful decongestant for the cardiovascular system. Centella Asiatica improves microcirculation functionality and retains skin elasticity (stretch marks, wrinkles).

How to use

Apply the product to the specific areas, massaging to spread it out.

Note: any deposit found at the bottom of the bottle is due to the totally natural origin of the product and to the richness of its active ingredients. Shake well before use.

WITH APPLICATOR

To complete the following treatments:

- ° Radio Frequency
- ° Endodermal
- ° Infrared
- Ultrasound
- ° Physio-sauna (Heat therapy)
- Press-massage
- ° Electrolipolysis

WHEN TO USE

In-Salon: Twice weekly as part of an Anti-Cellulite/Reduction/Fat Deposit package Self-treatment: daily application to the areas requiring treatment, massaging lightly until fully absorbed.

PHASE 1

First of all, apply:

48c INTENSIVE SERUM with Phosphatidylcholine

The intensive action of the Gel-Serum, thanks to the strong concentration of its active ingredients, significantly increases the lipolytic and draining effect even in individuals suffering from 3rd and 4th stage cellulite.

HOW TO USE: Apply the product with a light massage, only to the specific areas with the largest accumulation of Cellulite, until fully absorbed.

Note: any deposit found at the bottom of the bottle is due to the totally natural origin of the product and to the richness of its active ingredients. Shake well before use.

PHASE 2

Then apply:

46C CELLULITE CREAM with Caffeine

A Cellulite Cream with Lipolytic and Anti-inflammatory properties, helping to reduce the thickness of orange-peel tissue, bulges and fat tissue, with a strong Toning and Draining action. HOW TO USE: Apply a generous amount of product to the areas suffering from cellulite until fully absorbed, massaging with the preferred technique. The skin immediately looks brighter, silkier and firmer.

PHASE 3

Continue the treatment by applying:

47c GEL CREAM FOR FAT DEPÓSITS AND THIGHS

After the Cellulite treatment, a specific treatment should be applied for Fat Deposits, only to the blemished areas. The action of its active ingredients combats the formation of fat deposits and helps to reduce fat cells, Slimming Effect. Apply a generous amount of product to the areas suffering from fat deposits until fully absorbed, massaging with the preferred technique.

The 47c Cream is also ideal for male clients with fat deposits on the Abdomen and Hips.

In-Salon, with Applicator

To intensify the Cellulitelight treatment, if Radio Frequency has not already been used, the use of the following technologies is recommended after applying the 47c Cream:

- Infrared
- Ultrasound
- Physio-sauna
- Press-massage
- Electrolipolysis
- Endodermal

PHASE 4

Complete the Cellulitelight treatment by applying the

45c MASSAGE OIL with Phosphatidylcholine

The Intensive Massage Plant Oil with softening, elasticising and nourishing properties contains active ingredients with a Lipolytic and Draining effect to prolong the reducing and toning action, combating the imperfections caused by cellulite. HOW TO USE: Apply the product to the whole of the body and massage using the preferred techniques until fully absorbed.

Note: any deposit found at the bottom of the bottle is due to the totally natural origin of the product and to the richness of its active ingredients. Shake well before use.

RECOMMENDED:

58c DEAD SEA SALT SCRUB with the scent of Papaya* or 59c DEAD SEA SALT SCRUB with the scent of Green Tea*

Before performing the Cellulitelight treatment, apply an exfoliant to remove the dead cells and prepare the skin for the intensive action of the active ingredients contained in the Cellulitelight Kit. Mix the product well so that it is of an even consistency. HOW TO USE: Apply the scrub to the whole of the body, particularly in the critical areas, massaging in a circular motion for a few minutes. Remove any residue with a towel, damp sponge or shower.

In-Salon, with Applicator

For a deeper exfoliation, apply the scrub to the skin and proceed with the brushing function (large brush) and massage gently for a few minutes. Remove any residue with a damp sponge or shower.

* product not included in the Kit

Or

54c KERATOLYTIC GEL WITH DEAD SEA SALT, Salicylic Acid and Hyaluronic Acid Sodium Salt*

A soft, fresh gel. The very application of this cleansing, sanitising gel helps eliminate dead surface cells, leaving the skin's hydro-lipid film unchanged. Smoothing and purifying.

ACTION

Gently acts on skin impurities, producing remarkable luminosity: suitable for all skin types. This luminosity is obtained by the joint action of the Dead Sea Salt (purifying) and the Salicylic Acid (exfoliating and smoothing, with brightening power).

The beneficial effects of the treatment are completed by the Hyaluronic Acid Sodium Salt, a non-sulfated glycosaminoglycan with a very high molecular weight, capable of retaining a high quantity of water, a feature that no other compound is able to match. The hydro-elastic film formed on the surface of the skin also brings smoothing action which helps to temporarily reduce the appearance of minor skin blemishes and minor wrinkles.

The exfoliation treatment is effective yet gentle, ensuring optimum product performance (approximately 20 ml per treatment).

HOW TO USE: Apply a thin layer of the product to the required area and massage with circular movements, focussing on areas where the skin has thickened. Then remove using a damp sponge/tool.

In-Salon, with Applicator

For deeper exfoliation, apply the scrub to the skin and proceed with the brushing function (large brush), massaging gently for several minutes. Remove any residues with a damp sponge or shower.

* product not included in the Kit

Single-use wrap bandages moistened with a soft thermogenic gel with lodine Compound and Methyl Nicotinate and Extracts of Capsicum, Thyme and Horse-Chestnut. 250ml in a sachet

for characteristics of active ingredients, see page 100, 101, 104, 112

€ 17.40 cad.

ACTION

The Thermogenic and Stimulating Substances activate Surface Microcirculation and are particularly suitable for combating blemishes caused by Cellulite and/or Localised Fat Deposits, used alongside Slimming treatments. The 49c Thermogenic Gel Bandages also contain an iodine compound which, enhancing the effects of the active ingredients, makes the product more suitable for treatments against imperfections caused by Cellulite and Fat Deposits, creating a DRAINING effect.

METHYL NICOTINATE COMPOUND: A thermo-active product to improve

circulation: this results in effective activation of skin microcirculation, along with a pleasant and lasting

hot-cold sensory effect.

EXTRACT of CAPSICUM: brings circulation back to the

surface and reactivates skin

microcirculation.

EXTRACT of THYME: purifying, antimicrobial,

> deodorising and stimulating properties for capillary circulation, predominantly due to the timolol

content.

EXTRACT of HORSE-CHESTNUT: blood vessel-protecting and

astringent activity in the treatment of irritated skin and for the prevention of blemishes due to cellulite.

How to use

Apply from the ankle/foot to the inner thigh, abdomen, then wrap in a sheet of high-density polyethylene and leave for 30 minutes. Finally, sponge down the treated areas.

Note: Contains nicotinic acid esters; avoid contact with the eyes or mucous membranes.

Do not apply to fragile skin.

WITH APPLICATOR

The 49C Thermogenic Gel Bandages are also suitable for combining with treatments such as:

- Press-massage
- Ultrasound
- Heat therapy

When to use

In-Salon: twice weekly as part of a Slimming/Reduction treatment package iome: once weekly for maintenance, twice weekly for intensive treatment.

Pure Dead Sea Mud 1.5kg/5kg

for characteristics of active ingredients, see page 97, 105, 110

€ 45.00 cad.

ACTION

An exclusive formula with remarkable Toning and Firming action

Suitable for sufferers of Cellulite, Fat Deposits and Water Retention: Mineralization, Purifying, Relaxing. Helps to gradually shape the body contours, restoring firmness to the skin.

Also suitable for facial treatments such as Purifying and Firming mask.

How to use

Before applying the Mud, an exfoliating treatment with 43c Salt Scrub with Orange Essential Oil and Sea Salt is recommended. Using a wooden or ceramic (not metal) spatula, mix the Pure Dead Sea Mud with the water remaining on its surface, then apply an even layer over the entire area to be treated. Wrap the treated area in high-density polyethylene. Leave for 20/30 minutes.

Remove with warm towels or a shower. Move on to the next phases of the planned treatment.

WITH APPLICATOR

Apply the mud as described above.

Then, to intensify the specific action of the product, use one of the following technologies:

- Physio-sauna (Heat therapy)
- Thermal blanket
- ° Press-massage

Remove the mud as described above

After Radio Frequency treatment apply the Mud as described above in order to intensify the specific action of the active ingredients.

When to use

In-Salon: Once or twice weekly as part of a Firming/Toning package.

At home: once weekly.

520 Body Serum for adipose tissues and abdomen
For treatments with Oxygen
with Phosphatidylcholine and Caffeine
12x5ml

for characteristics of active ingredients, see page 100, 103

€ 48.90 cad.

ACTION

Lipolytic, Adipose: counteracts the formation of fatty deposits and promotes the reduction of fat cells, with SLIMMING EFFECT. This reduces the thickness of orange peel tissue, bulges and fat deposits: Toning, Draining action.

How to use

Shake product well before use. Pour the contents into the aerator reservoir and start the treatment, taking care to distribute the product evenly over the area to be treated.

Please follow the usage instructions carefully and pay attention to the warnings in the appliance manual.

WITH APPLICATOR

Shake product well before use.

- With Oxygen: pour the contents into the aerator reservoir and start the treatment, taking care to distribute the product evenly over the area to be treated. Please follow the usage instructions carefully and pay attention to the warnings in the appliance manual. In combination with Radio Frequency and Ultrasound treatments
- With Radio Frequency: first complete the treatment using the appliance, then apply the Serum.
- With **Ultrasound:** apply the Serum to the required area and then proceed with the appliance.
- With Electroporator: pour the contents into the appropriate applicator and start the treatment. Carefully follow the instructions for use and warnings indicated in the device manual.

WHEN TO USE

Once or twice a week as part of a Slimming/Cellulite treatment.

530 Cool Effect Gel Bandages with Peppermint and Melaleuca Essential Oils Box of 6 packs

for characteristics of active ingredients, see page 106

€ 17.40 cad.

ACTION

Disposable bandages soaked with a soft gel containing active ingredients which tone, soothe and refresh the skin. Bring instant lightness to the legs.

Promoting reducing action, they counteract vasodilatation and reduce swelling and heaviness in the lower limbs.

Improve the circulatory system, lymphatic system and the metabolism of fat cells.

Also suitable for firming treatments.

How to use

Apply starting from the ankle/foot to the inside thigh, then wrap in high density polyethylene for 30 minutes. To finish, clean the affected parts with a sponge.

WITH APPLICATOR

53C Cool Effect Gel Bandages are also recommended for use in combination with the following equipment:

- ° Pressure massage
- Ultrasound

WHEN TO USE

In-Institute: twice a week as part of a Slimming/Reducing treatment package.

At home: Once a week as maintenance, twice a week as an intensive treatment.

53C GEL BANDAGES PLUS

Pack contains 2 bandages, 10 m long * 10 cm wide, benefits include:

- ° a complete ankle-groin treatment for both legs
- ° rapid application, just one bandage per leg
- extendable bandages adapt to any leg shape
- * the use of a soft gel instead of a liquid means NO drips
- 250 ml of gel means the bandage is well-soaked, even on the inside.
- after the bandage is applied, approximately 30ml of gel will remain in the package, which can be massaged into the area concerned, enhancing the bandage treatment.
- The foil envelope packaging is internally coated with a protective film:

Resistant – prevents oxidisation – preserves product fragrance.

Total protection against light for proper cosmetic preservation.

54c Keratolytic Gel with Dead Sea Salt With Salicylic Acid and Hyaluronic Acid Sodium Salt 220ml

for characteristics of active ingredients, see page 95, 96, 110

€ 26.50 cad.

A soft, fresh gel. The very application of this cleansing, sanitizing gel helps eliminate dead surface cells, leaving the skin's hydrolipid film unchanged. Smoothing and purifying.

ACTION

Gently acts on skin impurities, producing remarkable luminosity: suitable for all skin types. This luminosity is obtained by the joint action of the Dead Sea Salt (purifying) and the Salicylic Acid (exfoliating and smoothing, with lightening power). The beneficial effects of the treatment are completed by the Hyaluronic Acid Sodium Salt, a non-sulfated glycosaminoglycan with a very high molecular weight, capable of retaining a high quantity of water, a feature that no other compound is able to match. The hydro-elastic film formed on the surface of the skin also brings smoothing action which helps to temporarily reduce the appearance of minor skin blemishes and minor wrinkles. 60 Intensive Fat Burning Mud-Gel with Caffeine and Marine Algae and Ivy Extracts 500ml

for characteristics of active ingredients, see page 97, 100, 102

€ 29.90 cad.

ACTION

Innovative Extra Thick Mud-Gel formula with a Heating effect. Compact and rich in functional substances, suitable for wraps and applications in treatments that help prevent and counter flaws of fat. The special texture of the Mud Gel, which perfectly adheres to the skin, increases the effectiveness of the various active ingredients it contains.

How to us

Apply the product onto the affected area and let it set for 30/40 minutes. The Mud-Gel adheres very well to the skin, favouring action of the various substances it contains. It can be used together with equipment such as Press Massage, Heat Therapy and Physio Sauna. After letting it set, you do not need to have a shower, but simply remove any excess product with a sponge and massage using your preferred technique until the product has been completely absorbed.

Warning: Contains esters of nicotinic acid; avoid contact with eyes and mucous membranes and, if necessary, wash under running water. Do not apply on fragile capillaries.

WITH APPLICATOR

Apply the Mud Gel as described above.

Subsequently, to boost the specific action of the product, proceed with a pressure massage.

When finished, remove the Mud Gel as described above.

WHEN TO USE

Two to three times a week, depending on the skin condition and on the required treatment.

Remove with a damp tool or shower. (no appliance required)

WITH APPLICATOR

Once the mud is applied, proceed with the infrared sauna blanket or pressotherapy treatment. Recommended time 30-40

80 ANTI-CELLULITE CREAM WITH DRAINING **ACTION**

Apply a generous amount of product and massage until completely absorbed.

Or

460 ANTI-CELLULITE CREAM WITH CAFFEINE Apply the product to the affected area, massaging as desired until completely absorbed.

O D Y

TREATMENT FOR OEDEMATOUS CELLULITE:

- Reduces blemishes caused by oedematous cellulite
- Softens the tissue
- Effect: drains the subcutaneous tissues (osmosis), smoothes the tissue and accelerates cell metabolism
- The skin is left smoother and brighter
- Average treatment duration: 50-60 minutes.
- Ideal number of sessions: 8 10 treatments
- Frequency: 1-2 times a week

M Н

- 90 ANTI-CELLULITE CREAM WITH DRAINING ACTION
- 19c REFRESHING FLUID FOR TIRED LEGS
- 33c HYDRATING BODY CREAM
- 41c DRAINING ACTION GEL BANDAGES
- **42c** SLIMMING GEL BANDAGES
- **46c** CELLULITE CREAM WITH CAFFEINE
- 58c 59c **DEAD SEA SALT SCRUB**

016 stimulating essential oil

Apply a few drops to the hands, warm them up, have the client gently inhale, then perform a short massage (palpation) of the neck and shoulders before palpating the entire body.

58c - 59c DEAD SEA SALT SCRUB

Mix the product well so that it is of an even consistency. Apply the scrub to the whole of the body, particularly in the critical areas, massaging in a circular motion for a few minutes. Remove any residue with a towel, damp sponge or shower.

WITH APPLICATOR

Apply the scrub to the skin and proceed with the brushing function (large brush) and massage gently for a few minutes. Remove any residue with a damp sponge or shower.

540 keratolytic gel with dead sea salt

Apply a thin layer of the product to the required area and massage with circular movements, focussing on areas where the skin has thickened. Then remove using a damp sponge/tool.

WITH APPLICATOR

Apply the scrub to the skin and proceed with the brushing function (large brush), massaging gently for several minutes. Remove any residues with a damp sponge or shower.

48¢ intensive serum with phosphatidylcholine Apply serum to specific areas with the greatest accumulation of cellulite, massaging gently until totally absorbed.

490 WARMING GEL BANDAGES

Apply the soaked bandages, leaving to rest for at least 30 minutes (appliance not required).

WITH APPLICATOR

Once you have applied the 49c bandages, proceed with pressotherapy treatment for approximately 30-40 minutes.

Having applied the bandages, proceed with the Electrolipolysis treatment for approximately 30 minutes.

After removing the soaked bandages, perform a treatment with Body Action technology: Ultrasound - Soft Laser - R.F.

&C Anti-cellulite cream with draining action Apply a generous amount of product and massage until completely absorbed.

As an alternative to applying 42c Bandages:

ZZC WARMING SLIMMING CREAM

Apply the product to the areas affected by the blemish, avoiding delicate zones.

Massage gently until completely absorbed and then apply 10c Intensive Anti-cellulite Mud. Warm the mud, then apply a thin layer all over the body. Wrap in high density polyethylene. Recommended time 20-30 minutes. Remove with damp sponges or shower.

WITH APPLICATOR

Once the mud is applied, proceed with the infrared sauna blanket or pressotherapy treatment. Recommended time 30-40 minutes.

ANTI-CELLULITE CREAM WITH DRAINING ACTION Apply a generous amount of product and massage until completely absorbed.

B O D Y

FIBROUS CELLULITE TREATMENT

- Reduces blemishes caused by fibrous cellulite
- Softens the tissue
- Effect: drains the subcutaneous tissues (osmosis), smoothes the tissue and accelerates cell metabolism
- The skin is left smoother and brighter
- The skin is left smoother and brighter
- Average treatment duration: 50-60 minutes.
- Ideal number of sessions: 8 10 treatments
- Frequency: 1-2 times a week

- 90 ANTI-CELLULITE CREAM WITH DRAINING ACTION
- WARMING SLIMMING CREAM
- 33c HYDRATING BODY CREAM
- **49c** DISPOSABLE BANDAGES SOAKED IN SOFT WARMING GEL
- 54c KERATOLYTIC GEL

FATTY DEPOSIT REDUCTION TREATMENT

016 STIMULATING ESSENTIAL OIL

Apply a few drops to the hands, warm them up, have the client gently inhale, then perform a short massage (palpation) of the neck and shoulders before palpating the entire body.

58c - 59c DEAD SEA SALT SCRUB

Mix the product well so that it is of an even consistency. Apply the scrub to the whole of the body, particularly in the critical areas, massaging in a circular motion for a few minutes. Remove any residue with a towel, damp sponge or shower.

WITH APPLICATOR

Apply the scrub to the skin and proceed with the brushing function (large brush) and massage gently for a few minutes. Remove any residue with a damp sponge or shower.

Or

540 KERATOLYTIC GEL WITH DEAD SEA SALT

Apply a thin layer of the product to the required area and massage with circular movements, focussing on areas where the skin has thickened. Then remove using a damp sponge/tool.

WITH APPLICATOR

Apply the scrub to the skin and proceed with the brushing function (large brush), massaging gently for several minutes. Remove any residues with a damp sponge or shower.

52v fatty-deposit and tummy serum

Shake product well before use.

Apply to the body, to the areas affected by the blemish, massaging gently until totally absorbed.

WITH APPLICATOR

Oxygen Treatment.

Shake product well before use. Pour the contents into the aerator reservoir and start the treatment, taking care to distribute the product evenly over the area to be treated. Please follow the usage instructions carefully and pay attention to the warnings in the appliance manual.

42 SLIMMING ACTION GEL BANDAGES

Apply the Phosphatidylcholine-soaked bandages, leaving to rest for at least 30 minutes (appliance not required).

WITH APPLICATOR

Once you have applied the bandages, proceed with pressotherapy treatment for approximately 30-40 minutes.

Or

Having applied the bandages, proceed with the Electrolipolysis treatment for approximately 30 minutes.

Oı

After removing the soaked bandages, perform a treatment with Body Action technology: Ultrasound - Soft Laser - R.F.

As an alternative to applying 42c Bandages:

47c FATTY DEPOSIT AND HIP CREAM

Apply the product to the areas affected by the blemish.

Massage gently until completely absorbed and then apply 50c Dead
Sea Mud

Warm the mud, then apply a thin layer all over the body. Wrap in high density polyethylene. Recommended time 20-30 minutes. Remove with damp sponges or shower.

WITH APPLICATOR

Once the mud is applied, proceed with the infrared sauna blanket or pressotherapy treatment. Recommended time 30-40 minutes.

6 FATTY-DEPOSIT REDUCING CREAM

Apply a generous amount of product and massage until completely absorbed.

BODY

FAT DEPOSIT REDUCING TREATMENT:

- Reduces fatty bulges, softens the tissue,
- helps sculpt the silhouette
- Effect: smoothes the tissue and accelerates cell metabolism, naturally reducing fatty deposits
- The skin is left smoother and brighter
- Average treatment duration: 50-60 minutes.
- Ideal number of sessions: 8 10 treatments
- Frequency: 1-2 times a week

FOR FAT TREATMENT

60 Intensive fat burning mud-gel

Apply the product onto the affected area and let it set for 30/40 minutes. The Mud-Gel adheres very well to the skin, favouring action of the various substances it contains. It can be used together with equipment such as Press Massage, Heat Therapy and Physio Sauna. After letting it set, you do not need to have a shower, but simply remove any excess product with a sponge and massage using your preferred technique until the product has been completely absorbed.

WARNING: Contains esters of nicotinic acid; avoid contact with eyes and mucous membranes and, if necessary, wash under running water. Do not apply on fragile capillaries.

WITH APPLICATOR

With the Mud applied proceed with the Pressure massage

Recommended time: 30-40 minutes.

Complete the treatment with 6C Rapid Action Fatty-deposit Reducing Cream.

Apply the cream to the relevant areas and massage with your preferred technique until fully absorbed.

FOR CELLULITE TREATMENT

6 C INTENSIVE CELLULITE MUD-GEL

Apply the product onto the affected area and let it set for 30/40 minutes. The Mud-Gel adheres very well to the skin, favouring action of the various substances it contains. It can be used together with equipment such as Press Massage, Heat Therapy and Physio Sauna. After letting it set, you do not need to have a shower, but simply remove any excess product with a sponge and massage using your preferred technique until the product has been completely absorbed.

WITH APPLICATOR

With the Mud applied, proceed with the Physiosauna or Pressure massage treatment.

Recommended time: 30-40 minutes.

Complete the treatment with 8C Anti-Cellulite Cream or 6C Rapid Action Fatty-deposit Reducing Cream.

Apply the cream to the relevant areas and massage with your preferred technique until fully absorbed.

FOR DRAINING TREATMENT

63C INTENSIVE DRAINING MUD-GEL

Apply the product onto the affected area and let it set for 30/40 minutes. The Mud-Gel adheres very well to the skin, favouring action of the various substances it contains. It can be used together with equipment such as Press Massage, Heat Therapy and Physio Sauna. After letting it set, you do not need to have a shower, but simply remove any excess product with a sponge and massage using your preferred technique until the product has been completely absorbed.

WITH APPLICATOR

With the Mud applied, proceed with the Physiosauna or Pressure massage treatment.

Recommended time: 30-40 minutes.

Complete the treatment with 8C Anti-Cellulite Cream.

Apply the cream to the relevant areas and massage with your preferred technique until fully absorbed.

FOR FIRMING TREATMENT

62c INTENSIVE FIRMING MUD-GEL

Apply the product onto the affected area and let it set for 30/40 minutes. The Mud-Gel adheres very well to the skin, favouring action of the various substances it contains. It can be used together with equipment such as Press Massage, Heat Therapy and Physio Sauna. After letting it set, you do not need to have a shower, but simply remove any excess product with a sponge and massage using your preferred technique until the product has been completely absorbed.

WITH APPLICATOR

With the Mud applied, proceed with the Physiosauna or Pressure massage treatment.

Recommended time: 30-40 minutes.

Complete the treatment with **14C Toning, Firming Cream**. Apply the cream to the relevant areas and massage with your preferred technique until fully absorbed.

TREATMENT WITH INTENSIVE FAT MUD-GEL

- Helps to reduce and prevent the formation of fat deposits.
- Indicative approximate duration of treatment without device:
 45 minutes.
- Indicative approximate duration of treatment with device: 60 minutes.
- Reducing effect.

Ideal number of sessions: 1 to 2 times a week for 4-6 weeks.

TREATMENT WITH INTENSIVE CELLULITE MUD-GEL

- Helps to reduce and prevent the formation of fat deposits.
- Indicative approximate duration of treatment without device:
 45 minutes.
- Indicative approximate duration of treatment with device:
 60 minutes.
- Prevent and contrast cellulite and "orange peel" skin.

Ideal number of sessions: 1 to 2 times a week for 4-6 weeks.

TREATMENT WITH INTENSIVE DRAINING MUD-GEL

- Helps to reduce and prevent the formation of fat deposits.
- Indicative approximate duration of treatment without device:
 45 minutes.
- Indicative approximate duration of treatment with device:
 60 minutes.
- Helps to reduce and prevent water retention, thereby stimulating and compacting tissues and skin.

Ideal number of sessions: 1 to 2 times a week for 4-6 weeks.

TREATMENT WITH INTENSIVE FIRMING MUD-GEL

- Helps to reduce and prevent the formation of fat deposits.
- Indicative approximate duration of treatment without device:
 45 minutes.
- Indicative approximate duration of treatment with device: 60 minutes.
- Helps to prevent and counter sagging skin, providing firmness, tone and elasticity.

Ideal number of sessions: 1 to 2 times a week for 4-6 weeks.

09 Drainina

A synergy of pure and natural essential oils Lavender, Lemon and Ylang-Ylang ENHANCED FORMULA

50ml

for characteristics of active ingredients, see page 105, 113

€ 14.50 cad.

ACTION

- Draining
- Balancing
- Brightening
- Decongestant

Facilitates and accelerates draining action and eliminates excess fluid.

APPLICATION

Suitable for use on the face and body ON THE BODY: use to open up the lymph nodes prior to a massage, or, on specific areas, where draining of the legs, arms, etc., is required.

How to use

3 – 4 drops Face Body 6 – 8 drops

O10 Toning

A synergy of pure and natural essential oils Mint, Rosemary, Sage, Lemon, Thyme and Juniper ENHANCED FORMULA

50ml

for characteristics of active ingredients, see page 105, 106, 108, 111, 112

€ 14.50 cad.

ACTION

- ° Toning
- Nourishing
- Refreshing

For dull, dehydrated and mature skin.

APPLICATION

Suitable for use on the face and body.

ON THE FACE: prior to anti-aging or toning massage/treatment.

ON THE BODY: in areas where skin lacks tone or before applying a specific mud.

How to use

3 – 4 drops Face Body 6 – 8 drops

A synergy of pure and natural essential oils Chamomile Flowers, Geranium, Sage, Eucalyptus, Lemon ENHANCED FORMULA

50ml

for characteristics of active ingredients, see page 100, 103, 104, 105, 111

€ 14.50 cad.

ACTION

- Soothing
- Brightening
- Refreshing

Bring instant freshness, decongests, soothes and calms. Helps to soothe delicate skin, reducing redness and irritation. Also ideal after hair removal.

APPLICATION

Suitable for use on the face and body Apply after cleansing the face, before a mask. After hair removal, in all delicate areas or where folliculitis is present; wherever redness occurs.

In combination with muds or anti-cellulite creams.

How to use

3 - 4 drops Face Body 6 – 8 drops

A synergy of pure and natural essential oils Melaleuca, Lavender, Sage, Rosemary and Thyme ENHANCED FORMULA

50ml

for characteristics of active ingredients, see page 105, 106, 111, 112

€ 14.50 cad.

ACTION

- Purifying
- Detoxifying
- Antimicrobial

For deep-down skin purifying action. Brings luminosity and smoothness to the skin, and a wonderful wellbeing sensation.

APPLICATION

Suitable for use on the face and body.

ON THE FACE: for oily, impure, thickened skin treatments. Suitable for acne, also in combination with specific creams or masks.

ON THE BODY: detoxifying, purifying action makes this product suitable for use on cellulite and where deep detoxification is required.

Suitable for use in combination with muds or anti-cellulite creams.

HOW TO USE

Face 3 - 4 drops Body 6 – 8 drops

O13 Sanitising

A synergy of pure and natural essential oils Lavender, Mint, Sage and Lemon ENHANCED FORMULA

50ml

for characteristics of active ingredients, see page 105, 111

€ 14.50 cad.

ACTION

- Sanitising
- Antiseptic
- Cleansing
- Revitalizing

For sanitising, antibacterial action and a comfortable, hygienic freshness.

APPLICATION

Suitable for use on the face and body.

HANDS AND FEET: Where small skin fissures are present. Specific post-aesthetic or curative treatment. Suitable for foot mycosis. Excellent for use in foot bath.

ON THE FACE: suitable for acne, oily and impure skin, also in combination with specific creams or masks.

How to use

Face 3 – 4 drops Body 6 – 8 drops

O15 Relaxing

A synergy of pure and natural essential oils Ylang-Ylang ENHANCED FORMULA

50ml

for characteristics of active ingredients, see page 113

€ 14.50 cad.

ACTION

- ° Relaxing
- ° Hydrating
- Antioxidant
- Softening

For a sensation of wellbeing and relaxation, improves the mood and reduces tension.

Hydrating, antioxidant properties act against wrinkles and stretch marks. Ideal for oily and dry skin.

APPLICATION

Suitable for use on the face and body.

ON THE FACE: As an opening to general face treatments. Massage gently on the temple area and follow with a head massage. In hydrating or anti-aging treatments in combination with specific creams or masks.

ON THE BODY: apply down the sides of the spine, to the palms of the hands and the soles of the feet, follow with a relaxing massage.

During treatment, diffuse into the air using an essence diffuser.

How to use

Face 3 – 4 drops Body 6 – 8 drops

ESSENTIAL OII

O14 Brightening

A synergy of pure and natural essential oils Myrtle, Melaleuca, Lavender, Orange Flower and Chamomile

ENHANCED FORMULA

50ml

for characteristics of active ingredients, see page 105, 106, 108

€ 14.50 cad.

ACTION

- Brightening
- Calming

For skin brightening action.

This product's decongestant and soothing properties make it suitable for couperose, delicate and sensitive skin.

APPLICATION

Suitable for use on the face and body.

ON THE FACE: in brightening treatments in combination with specific creams or masks. In subjects with couperose and sensitive skin in synergy with specific creams or masks.

How to use

Face 3 – 4 drops Body 6 – 8 drops

Stimulating

A synergy of pure and natural essential oils

Orange

ENHANCED FORMULA

50ml

for characteristics of active ingredients, see page 108

€ 14.50 cad.

ACTION

- Stimulating
- Elasticizing

Leaves the skin more elastic and toned. Recommended to boost energy and vitality, with strong stimulating effect. For use in wrinkle prevention treatments.

APPLICATION

Suitable for use on the face and body.

ON THE FACE: prior to stimulating massage/treatment. **ON THE BODY:** as an opening to general body treatments.

Reactivates lipid metabolism. Before applying a specific cream or mud.

How to use

Face 3 – 4 drops Body 6 – 8 drops

BeneXere®

A.H.A. FRUIT ACIDS

87v

The compounds generally used to achieve a smoothing or exfoliating action are the alpha hydroxy acids, or AHAs. The most well-known AHAs are glycolic acid, salicylic acid, lactic acid, citric acid and malic acid.

These components have been seen to provide an effective treatment for exfoliating the surface layers of the skin, i.e. peeling treatments.

ACHILLEA EXTRACT

68v - 79v

Protective, refreshing, toning, stimulating, astringent. Achillea boasts interesting cosmetic and dermofunctional properties, acting as an anti-inflammatory, firming the skin and removing redness and excess sebum. For this reason, achillea extracts are commonly used in products against inflammatory disorders of the skin and mucous membranes, and in circulatory disorders. Achillea is an excellent product for pimples, acne eruptions and sores, as well as undernourished, dry, cracked, delicate and reddened skin.

ALPHA LIPOIC ACID

62v

A liquorice extract with outstanding soothing and anti-inflammatory properties. Considered a "natural cortisone", Glycyrrhetinic Acid inhibits Phospholipase A2 and the production of Free Radicals, hampering at least two fundamental inflammation mechanisms, making it a powerful anti-inflammatory.

PHYTIC ACID

87v

It is a compound that is naturally present in cereals, which acts by binding iron ions that are responsible for the formation of free radicals and for lipid oxidation phenomena, which cause the skin to age. It also boasts remarkable depigmenting properties. Due to these characteristics, it is used in cosmetics to produce products combined with alpha-hydroxy acids with an antioxidant and depigmenting effect.

GLYCYRRHETINIC ACID

48c

Extracted from liquorice, it boasts remarkable soothing and anti-inflammatory properties.

Considered "natural cortisone", glycyrrhetinic acid inhibits Phospholipases A2 and the production of free radicals, obstructing at least two mechanisms essential to inflammatory phenomena, and is thus a powerful anti-inflammatory.

GLYCOLIC ACID

87v - fi6

This is the smallest of the alpha hydroxy acids. It is naturally found in foods such as fruit, beetroot and sugar cane. Its low molecular weight means that it is easily absorbed into the surface layer of the skin. Its activity is linked to the ability to reduce corneocyte cohesion for direct action on desmosomes. Exfoliation of the surface layer of the skin and the subsequent increase in speed of cell turnover results in an increased activity of fibroblasts and the production of collagen and elastin. Glycolic acid, thanks to its keratolytic properties, is used in high concentrations to produce cosmetics with exfoliating, anti-aging, anti-acne and lightening effects. In lower concentrations, it helps to hydrate the skin.

HYALURONIC ACID

6v - 12v - 13v - 14v - 16v - 18v - 63v - 200v - 201v - 202v - 203v - fi1 - fi2 - fi3 - fi4 - st2 - st6 - 54c - 62c

One of the key components of connective tissue.

It has a strong hydrating effect. Due to the molecular dimensions, it cannot be absorbed and remains on the surface, creating a barrier with a texturizing effect, which prevents the skin from drying out, increasing hydration.

Its particular chemical structure gives hyaluronic acid countless properties that make it especially useful in both medicine and cosmetics. Its ability to bond water and other substances results in the formation of protective gels, particularly useful for the skin and joints.

Stimulating the formation of collagen and connective tissue, hyaluronic acid protects the body from viruses and bacteria, increases the plasticity of the tissue and guarantees optimum **skin hydration**. It also has healing and anti-inflammatory properties. Hyaluronic acid is **an essential component of the skin**. Its properties are responsible for giving the **skin** its typical characteristics of elasticity and softness. Its level of concentration within the connective tissue of the skin tends to diminish with age. Whilst on the one hand, this constant and considerable decrease is one of the main causes of **skin aging**, on the other hand, the use of hyaluronic acid reactivates mature skin by stimulating cell functionality, restoring its firmness and brightness. In particular, treatment based on collagen and hyaluronic acid forms the basis of what are known as **fillers**, treatments used to fill and flatten out facial **wrinkles**.

HIGH MOLECULAR WEIGHT HYALURONIC ACID

63v - fi1 - fi2 - fi3 - fi4 - 54c

The compound's very high molecular weight ensures unrivalled water retaining ability. Hyaluronic Acid, due to its high molecular weight, is unable to penetrate the skin, but is distributed over the surface of the corneal layer, forming a thin permeable hydrolipid film capable of retaining a large amount of water on the surface of the epidermis. Hyaluronic Acid effectively hydrates the stratum corneum, limiting excessive water dispersion through perspiration.

Hyaluronic Acid, thanks to the hydro-elastic film formed on the surface of the skin, has a smoothing effect, reducing minor wrinkles and expression lines.

The topical application of hyaluronic acid allows the recreation of the ideal physiological environment for the skin cells, restoring and maintaining the conditions of young skin over time, for optimal cellular functionality. It compensates for the decreased concentration of this component in the skin, revitalising by restoring ideal hydration levels. In young subjects, applying Hyaluronic Acid helps to prevent skin aging and ensures the right degree of hydration.

LOW MOLECULAR WEIGHT HYALURONIC ACID (HYALURONIC ACID)

64v

Very low weight Hyaluronic Acid (1000-3000 daltons) is able to penetrate the skin and carry out its functions from within. This specific molecular weight allows easy absorption by the skin, balancing hydration and increasing skin stability. This improves cell cohesion and skin barrier effect. Thanks to its valued moisturising properties, hyaluronic acid also maintains skin hydration by acting as a "water reservoir" in the skin. The synergy of the two Hyaluronic Acids with different molecular weights maximises the benefits on the skin.

CROSS LINKED HYALURONIC ACID

64v

Hyaluronic acid is a fundamental component of our connective tissues and plays an important structural role in the skin alongside collagen and elastin. The main property of hyaluronic acid is that it binds a large number of water molecules, ensuring the hydration of the skin. Hyaluronic Acid is absorbed more efficiently by the skin and carries out its functions on the inside, making it more efficient and long-lasting. When applied to the skin it forms a fine layer which keeps the skin smooth and hydrated. The smaller molecules are able to penetrate into the subcutaneous layers giving firmness to the tissues and temporarily filling and smoothing small wrinkles. The Hyaluronic Acid film helps keep the skin young, elastic and toned. This improves cell cohesion and skin barrier effect. Thanks to its valued moisturising properties, hyaluronic acid also maintains skin hydration by acting as a "water reservoir" in the skin. The synergy of the two Hyaluronic Acids with different molecular weights maximises the benefits on the skin.

BeneXere®

REDIENTS

LIPOIC ACID

87v

Lipoic acid, also known as Thioctic acid, is a very particular vitamin: it is the only vitamin that is soluble in both fats and water. It is these properties that make lipoic acid an excellent anti-aging product: it acts by protecting both cell membranes and the cytoplasm. Let's see the mechanism of action of this substance. Lipoic acid is a molecule known for several decades to be a cofactor of significant enzymatic reactions. In recent years, great attention has been paid to its possible antioxidant effects and to those of its reduced form, dihydrolipoic acid, with the most interesting characteristics. In fact, it has been shown that it is primarily the reduced form of lipoic acid to neutralise many free radicals, thereby forming stable complexes with them, and it seems that it is able to regenerate other antioxidants, such as vitamin E and vitamin C from their radical forms.

MANDELIC ACID

82v - 87v

This is an alpha-hydroxy acid derived from almonds. Its main feature is that this product acts as a keratolytic without causing burning or redness, while maintaining its effectiveness. It is ideal to prepare the skin for subsequent treatments, maximising their results. Particularly active in the "repair" and reactivation of the aged epidermis, the compound's antibiotic and antibacterial properties make it effective in treating acne in the inactive phase. In addition, Mandelic Acid has strong depigmentation capacities that make it suitable for treating liver spots.

A detoxifying skin treatment (in the form of a face mask)

A blackhead treatment

Treatment of skin discolorations (e.g. liver spots) related to photo-aging

Improves the signs and symptoms of acne

Skin smoothing treatment

Anti-wrinkle treatment (for use as a surface wrinkle remedy)

An alternative treatment against rosacea (visually improves signs and symptoms of the condition)
Deep-down skin hydration (in combination with other substances, such as Hyaluronic Acid or Allantoin)
Mandelic Acid is known for its extraordinary exfoliating properties, with the (almost total) absence of skin side effects and contraindications. Unlike glycolic acid exfoliants or those prepared with other alpha-hydroxy acids (chemical exfoliants), Mandelic Acid peels do not cause photosensitisation.

SALICYLIC ACID

60v - 54c

A beta-hydroxy acid derived from enzymatic hydrolysis of salicin, a salicoside glycoside extracted primarily from the Salix alba plant (willow). It offers significant keratolytic and smoothing properties. Suitable for exfoliation of the superficial layers of the skin, it is effective in removing keratin plugs and clearing blackheads of their sebum content. It also brings antibacterial, drying and soothing action without causing irritation. It is mainly used in cosmetics designed to treat skin impurities, acne-prone skin and more generally for removing dead surface cells.

DISTILLED WITCH HAZEL EXTRACT

84v - 200v - 201v - 202v - 203v

Witch Hazel Extract is extracted from witch hazel flowers or from the tree itself. Above all, it cleanses and reduces pores. It also regulates sebum production and improves circulation.

It purifies and tones the skin, thanks to its antiseptic, astringent, brightening, dermopurifying, refreshing and anti-redness properties.

DISTILLED ORANGE BLOSSOM WATER

84v

Distilled Cornflower Water is widely used in the cosmetic industry by virtue of its acknowledged properties, such as: toning for tissues, decongestant for the eyes, regenerating for dry and irritated skin.

WITCH HAZEL

4v

The leaves and bark of hamamelis contain soluble tannins, active ingredients that possess a particular tropism in relation to cell membranes and the vessel walls, acting to protect the vessels, useful in cases of vasculopathy, with a regenerating action.

PURE DEAD SEA WATER

50c

100% pure original Dead Sea water.

This precious extract from the Dead Sea owes its uniqueness to the high concentration of salts dissolved in it, the natural result of the evaporation of the waters of this sea. The extract is removed and simply purified to make it suitable for cosmetic use; this means it retains its characteristic oily consistency, the absence of colour and odour, and makes it particularly effective in mineralising treatments for wellness and skin beauty. Helps resolve a range of imperfections, such as impure, weak and "orange peel" skin.

ALPHA-BISABOLOL

18v

Thanks to its properties, it is used in cosmetics designed for sensitive and delicate skin. It has an effective soothing effect in products for inflamed, irritated skin, affected by atopic and seborrheic dermatitis and general irritation.

ALGAE EXTRACT

60c

Algae were among the first living organisms on Earth to populate the seas. They are characterised by a high content of mineral salts, vitamins and organic material. We can identify their "origin" from their colour: green algae generally live at surface level - free or attached to rocks - while red and brown algae live deeper under water. Algae has several different uses, from beauty to pharmaceuticals and food. These simple organisms boast extraordinary cosmetic properties:

- They prevent the degradation of collagen and elastin
- They protect the tissues from environmental stress
- They maintain optimum hydration
- They protect against the action of UV-A rays

SEAWEED

60c

Seaweed is used in cosmetics as it is rich in vitamins A, C and group B (antioxidants), mineral salts containing iron, phosphorus, copper, magnesium, manganese and iodine (useful for toning the skin), proteins and essential fatty acids (for maintaining and restoring the skin's Natural Moisturizing Factor). It performs important roles in terms of hydration, softening and as a radical scavenger, a so-called "sweeping" function, aimed at removing unwanted impurities. The most commonly used algae for treating blemishes caused by cellulite are species of brown algae (laminaria, fucus vesiculosus, kelp) and green algae (chlorella, spirulina). The components of algae, once absorbed into the skin, are capable of stimulating cell metabolism and microcirculation, helping to eliminate toxins, with immediate beneficial effects on skin tone and hydration.

ALLANTOIN

72v - 80v - 200c - 201c

A substance which stimulates tissue regeneration, promotes skin turnover and favours the proliferation of keratinocytes (replacing dead cells with new cells).

ALOE

69v - 44c

Aloe Vera is known for its outstanding soothing, protective and hydrating properties. Aloe juice mainly hydrates and soothes the skin, but also possesses antifungal and antimicrobial properties. As with mucopolysaccharide-rich products, Aloe Gel forms a protective film on the skin, which makes it an excellent moisturising agent.

Traditionally Aloe is known for its healing, soothing, redness-reducing properties. Aloe plant constituents also appear to be able to stimulate the production of collagen and elastin, helping to counteract the effects of skin aging. Extraordinary properties are to be found in its innumerable active ingredients and nutritional components. In fact, this plant is considered a sort of natural pharmacy comprising a wide range of compounds – scientists have discovered more than 150 active ingredients that have important functions ranging from anti-tumour to analgesic, antimicrobial and anti-inflammatory. Aloe extract brings intense anti-redness and softening action. It is ideal for mature, weak, devitalised, dull or dehydrated skin.

PINEAPPLE

6c - 7c - 22c

Obtained from the stalk of the Ananas Sativus, it improves the overall functionality of microcirculation. Pineapple extract also boasts soothing properties and reduces redness, particularly suitable for treating blemishes caused by cellulite. Acts by draining the oedematous tissue and improves the permeability of capillaries.

WHITE CLAY

68v

Dermopurifying, Remineralising. Ideal for relieving skin disorders such as eczema, allergies, pimples, inflammation, acne, blackheads and burns: in fact, this mineral substance absorbs toxins and "purifies the skin", also promoting circulation.

SNAIL SECRETION

65v - 86v

Thanks to the high concentration of functional substances such as Collagen, Elastin, Allantoin, Glycolic Acid and Vitamins, Snail Secretion (slime) is used in cosmetics for the following properties:

- Nourishing: nearly 80% of skin is made of elastin and collagen fibres, substances which should be integrated using cosmetic products containing them. For this reason, the mucous produced by snails, used as an active ingredient in creams, leaves the tissues more elastic and toned, with a consequent healthy effect on wrinkles, which become less visible.
- Regenerating/Healing: this is due to the effects of allantoin, which stimulates the production of elastin and collagen fibres, allowing tissue repair and the softening of wrinkles. Allantoin can actually remove all signs of some scars, skin blemishes and burns and also slows down the skin ageing process.
- Exfoliating: thanks to the presence of glycolic acid, a cream containing snail secretion allows delicate peeling of the skin surface layer, useful in reducing skin blemishes.
- Purifying: Peptides and Glycolic Acid, contained in snail secretion, are the main purifying compounds. These substances prevent the accumulation of impurities or, if already present, can repel them. For this reason, a cosmetic product containing snail secretion can be helpful in tackling acne.
- Hydrating: thanks to the proteins present, snail secretion helps to oxygenate tissues and to hydrate, leaving the skin feeling wonderfully healthy. Hydro-restitution (fluid reserves) thanks to mucopolysaccharides, which retain water on the skin for a long time and ensure a long-lasting moisturising effect.
- Antioxidant: Vitamin C and Vitamin E reduce inflammation and counteract free radicals.
- Soothing: useful for redness caused by excessive exposure to the sun or cold thanks to the allantoin combined with mucopolysaccharides and proteins.
- Anti-wrinkle: thanks to the stimulation of native collagen synthesis due to the glycolic acid combined with collagen, elastin, vitamins and mucopolysaccharides. Effective on signs of acne, blemishes and scars thanks to the exfoliating, smoothing, purifying and grease-reducing glycolic acid, mediated by the soothing effect of the other components.

BIO-MARINE COLLAGEN

33c

Antioxidising activity. Also plays an important role in improving the condition of the skin, slowing down **premature aging** processes by protecting it from harmful photo-aging factors.

Its lifting effect combats skin aging. It performs a highly effective hydrating and hydro-restorative action, essential for the beauty and brightness of dehydrated, dry skin suffering from wrinkles and crow's feet.

BONT PEPTIDE

fi1 - fi2 - fi3 - fi4 - fi5

This is a synthetic protein that mimics the action of Botulinum toxin (Botox-like).

BoNT-Peptide acts by restricting muscle contraction in the skin, thus reducing the presence of expression lines, particularly those around the eyes and lips.

SHEA BUTTER

16v - 204v - 205v - 206v - 207v - fil - fi2 - 25c - 26c - 27c - 28c - 201c

A vegetable fat that comes from the tree Butyrospermum Parkii, belonging to the Sapotaceae family.

The butter can be extracted from the seeds and its main chemical constituent is a high level of triglycerides, responsible for the softening, hydrating and regenerating properties that are beneficial to the skin barrier. Thanks to the high level of unsaponifiables, rich in terpineol (keratin) and to a lesser degree phytosterols, it is a precious natural anti-wrinkle and anti-aging ingredient for the face and body, capable of restoring firmness and elasticity to the skin. Shea butter also contains tocopherols (vitamin E), which act as natural antioxidants.

Shea butter is mainly used in cosmetics to soften, hydrate and moisturise the skin.

CAFFEINE

6c - 7c - 46c - 48c - 52c - 60c - 61c

Caffeine is an active ingredient commonly used in reduction creams and for treatments to combat blemishes caused by cellulite. This is due to its lipolytic properties, which trigger a mechanism to break down the fat contained in the cells. Caffeine is also contained in reduction products as it stimulates skin microcirculation and helps to eliminate excess fluid, making the skin firmer. This results in a reduction in thickness of the orange-peel tissue, in the bulges and fat deposits, improving skin tone.

CHAMOMILE EXTRACT

60v - O11 - O14

Acts on the skin to soothe it and reduce redness, suitable for treating delicate and sensitive skin.

EXTRACT OF CAPSICUM

22c - 49c

Extract of capsicum contains carotenoids and substances with a rubefacient effect: it brings circulation back to the surface and reactivates skin microcirculation. When applied to the skin it increases blood flow and provides heat. Widely used in the pharmaceutical industry, the capsicum is used in cosmetics as an ingredient in thermo-active products.

CARTININE (CARNITINE LINOLEATE)

61c

Carnitine is a molecule known for its ability to promote the reduction of body fat and the development of lean body mass. For these reasons, it has long been widely used in the field of food supplements. Its use in cosmetics as an effective active ingredient in treating cellulite is more recent. In our products we use a particular complex in which the cartinine molecule is conjugated with an ester of linoleic acid, whose chemical form makes it more bioavailable and therefore more effective in fighting cellulite.

SPÄTLAUBER APPLE PLANT STEM CELL EXTRACT

st1 - st2 - st4 - st5 - st6

Every cell in a living organism is specialized and carries out a specific function. Stem cells are "primitive" cells, not yet specialized to carry out a specific process; they are therefore capable of transforming and generating new tissue, rejuvenating and repairing the cells of our body which, with the passing of time, have lost their rejuvenating function.

Uttwiler Spätlauber apples, originally from Switzerland, have one particular characteristic which is different from other varieties of apple: they don't "wither" because they contain large numbers of longevity stem cells which protect the fruit and guarantee its longevity.

CENTELLA ASIATICA

6c - 7c - 8c - 9c - 19c - 48c - 62c - 63c

This is one of the most important medicinal herbs for the connective tissue, both through systemic administration and applied locally. Centella extract is used to treat both cellulite and skin slackening.

Thanks to its healing and regenerative properties, Centella Asiatica combats loss of elasticity and the appearance of wrinkles and stretch marks. The extract is also a powerful decongestant for the cardiovascular system and is used to treat circulatory disorders. Centella asiatica is used in various skincare products to treat blemishes caused by cellulite, to improve microcirculation functionality and to maintain skin elasticity (stretch marks, wrinkles).

YOUR SERVICE

CUCUMBER

83v

Refreshing and moisturising, it helps to tone and firm the skin.

Soothing for irritable skin, cucumber is rich in sulphur, with obvious decongestant properties. It also has a cleansing effect, reduces and cleans dilated or clogged pores and is also suitable for more sensitive skin that does not tolerate soap or hard water.

MARINE COLLAGEN

200v - 201v - 202v - 203v

Essential constituent of the skin, which acts as a moisturiser and softener. Thanks to its elasticising properties, it makes the skin toned and soft.

ANTI-AGING ENERGISING MINERAL COMPLEX

fi3 - fi6

This is a blend of essential elements (zinc, copper and magnesium) that forms a valuable source of energy for cell metabolism.

Magnesium is essential for keeping the skin in good physiological condition.

Copper promotes the synthesis of keratin, a protein that forms the basic structural component of skin, hair and nails.

Lastly, zinc promotes the synthesis and stability of structural proteins, ensuring that the skin is kept in optimum condition. The combined action of these minerals results in a powerful protective synergy to combat damage to the skin caused by free radicals.

The results are clear to see: bright, reinvigorated and toned skin, which is much more capable of combating the stresses of everyday life.

IODINE COMPOUND

49c

An organoiodine molecule used in the local treatment of cellulite and/or fat deposits. Unlike other iodine derivatives, it does not stimulate hormones, but acts locally to combat fat deposits; in minimal amounts which do not exceed, per application, the iodine contained in 100g of strawberries.

METHYL NICOTINATE COMPOUND

49c

Nicotine acid esters are used in small doses to treat blemishes caused by cellulite, as thermo-active products to improve capillary circulation: this results in effective activation of skin microcirculation, along with a pleasant and lasting hot-cold sensory effect.

DMAE

87v

From the structural perspective, **Dimethylaminoethanol** – defined as **DMAE**, in short – is a primary alcohol with a structure similar to choline; therefore, it represents a precursor of

significant biologically active molecules, such as Acetylcholine.

Experimented in the pharmacological field due to its neurotrophic potential in the management of hyperactivity disorder, rather than in other neurological pathologies, such as Alzheimer's or autism, unfortunately with inconsistent results, the use of DMAE was subsequently also extended to treat and prevent skin aging.

However, in dermatology, DMAE has been shown to be mainly effective as an antioxidant, protecting cell membranes and other structures of the dermis and epidermis from aberrant reactions sustained by oxygen free radicals.

The good pharmacokinetic properties, improved by the specific use of excipients, facilitated the topical use of this pre-vitamin, thereby guaranteeing significant and effective transcutaneous absorption.

HEDERA HELIX EXTRACT

(HEDERA HELIX EXTRACT)

22c - 60c - 63c

lvy is an important plant in the cosmetics sector, which owes its rejuvenating, soothing and toning properties to a complex of triterpenoid saponins. The extracts are used in products intended for the adjuvant treatment of cellulite and to the simultaneous treatment of skin tension and swelling.

ELASTIN

14v - 14c - 15c

This fibrous protein is present in connective tissue and mainly consists of the amino acids glycine, valine, alanine and proline, a key component of elastic fibres. **Elastin** gives the skin its characteristic elastic response when subjected to mechanical stress.

Hydrating and protective effect on the surface layer of the skin. The action of elastin is enhanced when combined with hydrolysed collagen and/or soluble collagen.

EQUISETUM

620

Draining effect. Also known for its healing properties.

The abrasive properties of equisetum are utilised in certain cosmetics used for peeling. The plant is also widely used to prevent **wrinkles** and **skin aging**, to treat stretch marks, cellulite, orange-peel skin and to firm key areas, eliminating fat deposits.

AESCIN

48c

his is the active ingredient contained in the seed of the horse-chestnut, with anti-edematous and anti-inflammatory properties. In cosmetics, its characteristics are beneficial to the treatment of blemishes caused by cellulite. It is known for its remarkable draining and detoxing effect, useful when there is an accumulation of toxins; it helps microcirculation and cell turnover, protects the blood vessels and strengthens the connective tissue of the blood vessels.

PLANT EXTRACTS

18v - 8c - 9c

Plants are one of the main sources for the raw materials and functional active ingredients used in cosmetics. We use different types of plant extracts to create specific body products, and to treat blemishes like cellulite, stretch marks, loss of tone and aging.

LIQUORICE EXTRACT

89v

The beneficial properties of liquorice: it has unique benefits for the skin, due to the presence of glycyrrhizin, a triterpene saponin with a pronounced anti-inflammatory and anti-viral action, and of B-Glycyrrhetinic acid, a healing and soothing active substance.

Liquorice extract is a powerful tool in lightening the areas of the skin that are characterised by hyperpigmentation, limiting the production of melanin, and is also very effective in the treatment of skin spots and in soothing the effects of sunburn.

Thanks to its potent healing powers, it is ideal for countering acne and pimples, as well as more serious skin issues, such as psoriasis, eczema and dermatitis.

EUCALYPTUS

011

Eucalyptus is a plant known for its balsam, antibacterial and healing properties. It is also used to fight pimples in cosmetic preparations for oily skin. It counteracts unpleasant odours and is highly refreshing too.

CORNFLOWER

83v - 200v - 201v - 202v - 203v

Astringent, known for its astringent properties, for an instantly effective feeling. intensely moisturising, matt finish. The extract of the fungus fomes officinalisalso has a toning effect on the skin, making it firm and more elastic.

PHOSPHATIDYLCHOLINE

87v - 42c - 45c - 47c - 48c - 52c - 61c

Phosphatidylcholine is a molecule extracted from the soybean, known and used

for many years. Its chemical and physical properties are similar to those of the natural lipids of the skin's stratum corneum, so when applied topically, it integrates perfectly by penetrating optimally and working as a carrier for other active ingredients. It is a molecule capable of emulsifying fats and consequently promoting their elimination and conversion into energy. In cosmetics, it helps counteract blemishes caused by cellulite and/or fatty deposits. It is one of the fundamental constituents of cell membranes, giving them appropriate fluidity and promoting osmotic exchange with the outside. Phosphatidylcholine is produced in a known sequence of internal biosynthesis but even when administered from the outside, it penetrates through the superficial layers of the epidermis until it reaches the fibres of the dermis.

FUCOSE

st3 - st4 - st5

The cosmetic properties of fucus extract are associated with the ability to shape, slim down and reduce subcutaneous cellulose/fat tissue. Thanks to the presence of alginates, polysaccharides capable of bonding with large quantities of water, fucus extract performs a good hydrating, softening, moisturising and protective action; suitable for use in cosmetics aimed at treating blemishes caused by cellulite and localised fat deposits.

REISHI MUSHROOM (GANODERMA)

63c

Ganoderma lucidum (Reishi in Japanese, Ling Zhi in Chinese) is a saprophyte fungus; it grows solitary or in few specimens, from spring to autumn, on stumps of broad-leaf trees, in particular oak and chestnut. Its colour varies from orange red to brown, and it is typically shiny, and lacquered.

It is ranked as one of the ten most effective natural therapeutic substances in nature. In China and Japan, it is called the "mushroom of immortality" and its use in the East dates back to many centuries before Christ. It is widely used in the form of powder, in aqueous decoctions, in alcoholic extracts or in capsules. It acts primarily as a regulator of organic functions; it is considered a great adaptogen, the best choice for a general body stimulus and support.

In the last 30 years, the CIRCA 400 bioactive fungal molecules (primarily triterpenes and polysaccharides) have been studied in depth; in particular, as regards the cosmetic action able to recover water retention and swelling (anti-inflammatory prop) of **Ganoderma Lucidum**, clinical studies have shown the overall improvement of the skin in terms of hydration, tone and recovery of imperfections related to water retention and poor circulation.

Thanks to the presence of ganoderic and oleic acids, it helps make the skin more toned and smooth by counteracting acne and epidermis spots. The antioxidant effect reduces the aging of skin cells with a completely natural anti-aging effect. Lastly, it conveys benefits on scars of various origin present on the skin, thanks to a relaxing and regenerative effect of the epithelial tissue.

ROSE GERANIUM

011

Regulates the production of sebum, and with an astringent, disinfecting and healing action, excellent for treating acne or dry skin. A soothing and excellent revitalising action, combating skin slackening, stimulating circulation, stimulating the lymphatic system, suitable for combating imperfections due to skin slackening (stretch marks) and, above all, for anti-cellulite massages. Slows down skin aging and the appearance of wrinkles; recommended for mature skins also as a preventive measure.

GINKGO BILOBA

22c

Ginkgo extract is a strong combatant against free radicals, demonstrated by an improvement in cell metabolism and the prevention of lipid peroxidation in the membrane, as well as a significant protective action on the inner lining of the blood vessels, stabilizing the permeability of capillaries and, consequently, improving microcirculation functionality. In cosmetics, it is used to protect the skin from oxidative stress, in anti-aging products designed to improve microcirculation functionality (cellulite and capillary fragility).

Guarana extract

46c

The climbing plant native to the Amazon, of which the seeds are used, is one of the few plants, together with Coffee, Tea and Cola, that contains caffeine. Guarana is used in cosmetics thanks to its lipolytic activity due mainly to the high caffeine content present in the seeds. One of the major beneficial properties of Guarana is its energising effect. Since Guarana is released in the body more slowly than caffeine, its effects will be more powerful and long-lasting than coffee.

H.F.S (Hyaluronic Filling Sphere)

64v

An innovative patented biotechnological Cross-Linked Hyaluronic Acid molecule with filler effect. This molecule combines the special features of Hyaluronic Acid with the extraordinary performance of the Hyaluronic Acid 9X Biospheres.

WITCH HAZEL

4v - 6v

The leaves and bark of hamamelis contain soluble tannins, active ingredients that possess a particular tropism in relation to cell membranes and the vessel walls, acting to protect the vessels, useful in cases of vasculopathy, with a regenerating action.

ST. JOHN'S WORT EXTRACT

88v

St. John's Wort contains an essential oil, flavonoids (iperina) and diantrons (hypericin).

From an aspect of the topical and cosmetic effect, the main substance is iperina and, in fact, its soothing and anti-redness properties associated with the purifying properties of the essence, allow useful cosmetic effects to be obtained from St. John's Wort.

EXTRACT OF HORSE-CHESTNUT

49c - 63c

Extracted from the seeds of the large tree, it is a triterpine saponin known as Aescin, an active ingredient of the extract. In cosmetics, it is used for its blood vessel-protecting and astringent activity, in the treatment of redness of the skin and for the prevention of blemishes due to cellulite.

IRIS

23v - 24v

Iris root extract is beneficial to the skin's self-regulating process, helping it to manage its water resources. It strengthens the skin's defences and helps to maintain the balance of the hydrolipid film, regulating the production of sebum, which if unbalanced can lead to the appearance of various impurities, blocked pores or blackheads.

OURE AI OUR SERVICE

LAVENDER EXTRACT

60v - 201c - O9 - O12 - O13 - O14

Lavender has moderate toning and bacteriostatic properties.

YEAST EXTRACT

14c - 15c

A natural source of substances that are beneficial for a healthy body and for nourishing the skin and hair. Yeast is an effective ingredient in purifying the skin and restoring its beauty (particularly in the case of oily and dull-looking skin) and treating and preventing acne.

LEMON

09 - 010 - 011 - 013

Lemon has brightening, astringent, toning, sanitising and aromatising properties. It is an active ingredient in products for the treatment of impure, oily skin, where dilated pores and blackheads are present.

LIPOPEPTIDE

fi4 - fi5

Naturally present in collagen, it stimulates the synthesis of the six main components of the dermal matrix. This component helps to "fill out" the wrinkles, "reconstructing" the skin, where necessary.

MACADAMIA

46v

Extracted by cold-pressing the seeds of the plant of the same name, ideal for dry skins, ultrahydrating; softening-rejuvenating action.

88v

A delicate mucilage of polysaccharide nature is obtained from the leaves and flowers, which, together with amino acids and anthocyanins, constitutes the active part of the drug. In cosmetics, both the extract and the mucilaginous fraction are used to obtain an emollient, soothing and refreshing effect.

MARIS LIMUS

50c

Benexere Pure Dead Sea Mud comes from Jordan, the least exploited area with the highest concentration of Mineral Salts, containing precious minerals and trace elements (magnesium, potassium), making it world-renowned. It is an effective ingredient in all treatments aimed at combating skin imperfections caused by cellulite/fat deposits/water retention. Dead Sea Mud is certainly the richest of all natural muds in terms of minerals, especially sodium, magnesium and bromine salts. These characteristics make it suitable for treatments to combat cellulite and fat deposits; thanks to its high sulphur content, with its gentle keratolytic action, it can also be used as a beauty mask for the face and neck. Suffice it to say that the Dead Sea is the basin with the highest concentration of salt on the face of the earth, ten times the salinity of any other sea. This is due to the continuous evaporation of water (induced by dry weather conditions and the lack of tributaries), making the dissolved salt gradually more and more concentrated. Moreover, tests performed on the salt content show a clear prevalence of magnesium and potassium salts (essential to the human body, including the nervous system and the muscular system), to the detriment of sodium salts, which are far less useful to the body. When applied locally, Pure Dead Sea Mud stimulates tissue recovery and particularly in relation to the fabric of the skin, where collagen and elastin are already hardened fibres, in the case of advanced cellulite.

MELALEUCA

53c - O12 - O14

Typical of the Australian Outback, the melaleuca is also commonly known as the Tea Tree. It contains various aromatic and disinfectant substances. Studies have shown that Tea Tree oil possesses antibacterial, antiviral, antifungal and anti-inflammatory properties. Extremely soluble in fats, tea tree is easily absorbed by the body even when applied to the skin. Thanks to its effective antiseptic action, combined with perfect skin tolerance, Melaleuca essential oil is an active ingredient in many cosmetic products for the treatment of oily, impure and acne-prone skin.

MENTHOL

201c - O10

Menthol is an active ingredient of peppermint essential oil. Used since the dawn of time, it has refreshing, decongestant, antiseptic and disinfectant properties. In low concentrations it is incorporated into the formulation of ointments, lotions and perfumes, due to its characteristic aroma and its refreshing effect upon application on the skin. Menthol is ideal for relieving skin redness after aesthetic treatments such as hair removal, thanks to the refreshing, decongestant and slightly analgesic effect (specifically by stimulating a thermal receptor present in the skin). Indicated in cosmetic preparations designed to mitigate fatigue in the legs, as well as specific products for burns and sunburn.

BLUEBERRY

6v - st6

This extract is rich in anthocyanins, polyphenols that act to protect and normalise the permeability and fragility of capillaries. It also boasts antioxidising properties and has a high capacity for facilitating synthesis of collagen fibres.

Suitable for the treatment of irritated, fragile and sensitive skin. It performs a soothing action on sensitive and red skin, maintaining balance and strengthening natural defences and improving its appearance.

MYRTLE

014

Toning, balsam, antibacterial and dermopurifying. Brings astringent action to oily, inflamed and acne-prone skin. It also boasts deodorising properties.

N.M.F NATURAL MOISTURISING FACTOR

16v - 79v - 84v

Hydrating, Humectant.

VEGETABLE OILS AND BUTTERS

200c

Nourishing and Elasticising: Complex of Wheat Germ, Sweet Almonds, Soy and Shea.

TEA TREE AND ROSEMARY ESSENTIAL OILS

68v - 79v - O10 - O12

Purifying, Stimulating. Tea Tree Oil has antibacterial, healing, antimicrobial and deodorant properties, especially suitable for skin with acne and inflamed pimples. Rosemary Essential Oil is known as a medical substance, above all for its stimulating and purifying properties, but also for treating oil skin and sun-induced eczema. Precisely because Rosemary Essential Oil possesses natural disinfectant and antiseptic properties, it is particularly suitable for soothing and treating impure skin.

TRACE ELEMENTS

23v - 24v

A "mix" of mineral substances such as iron, zinc, iodine, copper, fluorine, manganese, present in very small quantities in the body. They bring various benefits, depending on the specific individual elements present.

ARGAN OIL

62v - fi1 - fi2

Obtained from pressing the kernels of the Argania Spinosa, a thorny evergreen tree native to Morocco, belonging to the family Sapotaceae. Due to the high concentration of essential fatty acids and vitamin E, Argan oil keeps the skin hydrated, helps to oxygenise cells and protects the skin from harmful external factors, neutralizing free radicals and leaving the skin feeling soft, smooth and silky.

AVOCADO OIL

12v - 13v

This product is widely used in cosmetics due to its excellent eudermic and sebum-like, nourishing and regenerating characteristics, making it especially suitable for dry skin, which is devitalized, rough, dehydrated, prone to eczema or "dull-looking". The functional substances contained in the unsaponifiables of avocado oil are in fact capable of stimulating the activity of dermal fibroblasts, facilitating synthesis of collagen. This all results in an effective action to stimulate skin renewal, with the subsequent increase in skin hydration and elasticity. Due to these characteristics, cosmetics containing Avocado Oil are particularly suitable for anti-wrinkle, anti-stretch mark and firming, as well as for sun protection and softening and hydrating the skin.

COCONUT OIL

202c

Nourishing and Protective. Very nourishing, it significantly reduces skin dehydration and has a strong soothing effect. Its effect is that of an actual balm on the skin: it deeply nourishes the skin, prevents dehydration and soothes chapping and possible inflammation, burns and disorders. It also has an anti-aging effect, perfect for mature skin. It contains Vitamin A and Vitamin E; the former has an anti-radical effect, therefore it protects against tissue degradation, whereas the latter is a natural antioxidant.

RICE BRAN OIL

55v - 56v

Used for its beneficial effects on sensitive skin, due to its hydrating properties resulting from the high squalene content, it is a natural skin hydrator.

JOJOBA OIL

330

This dense oil is extracted from the seeds of the Jojoba, a plant belonging to the Buxaceae family which grows naturally in the desert areas of Arizona, Mexico and California. Its total lack of glycerin means that it is quite unlike all other oils as it is not a fat, but a liquid wax. This characteristic makes Jojoba Oil very easy for human skin to absorb and highly suitable for skincare. It is also rich in natural antioxidants and does not irritate the skin. It is used as a conditioning and softening agent for the skin and hair.

3v - 200v - 201v - 202v - 203v - 24c - 39c - 40c - 202c

Ottenuto dalla spremitura delle mandorle dolci, è conosciuto ed utilizzato da secoli nella cosmesi. Dotato di spiccate proprietà emollienti, addolcenti, lenitive, protettive ed elasticizzanti, ricco di proteine, glucidi, sali minerali e vitamine (soprattutto vitamina A e gruppo B), è particolarmente dermoaffine ed adatto ad ogni tipo di pelle anche molto sensibile e delicata.

ROSA MOSQUETA OIL

33v

Obtained from pressing sweet almonds, this has been a well-known product used in cosmetics for centuries. With its remarkable softening, smoothing, protective and elasticizing properties, as well as its high content of proteins, glucides, mineral salts and vitamins (especially vitamin A and group B), it is particularly skin-friendly and suitable for any skin type, even highly sensitive and delicate skins.

SOYBEAN OIL

25c - 26c

Soybean oil, although it does not contain Vitamin E (anti-aging par excellence), is an excellent source of phytoestrogens, which has a comparable effect to oestrogen hormones and plays an important role in the preservation of youth. For skin and hair care. Soybean Oil boasts outstanding cosmetic properties. Its active ingredients are often incorporated into face, body and hair products as they protect against oxidation, skin inflammation and UV rays, regulate melanin synthesis, and stimulate the production of collagen I and III, elastin and hyaluronic acid, inhibiting elastase (the enzyme responsible for the degradation of collagen) and redensifying the cellular structure. Thanks to its high percentage of isoflavones, soybean oil is particularly suitable for stretch marks and extremely dehydrated skin.

ORANGE ESSENTIAL OIL

014 - 016

Refreshing and revitalising action, thanks to its toning properties and its ability to hydrate and firm the skin. The essential oil is extracted from the peel, full of vitamins, mineral salts and substances useful for treating the body. The beneficial properties of this oil are well known; it helps to overcome tiredness thanks to its relaxing effects.

It has toning, stimulating effects on the immune system. It also acts against the appearance of cellulite and the first stretch marks. Due to its strong smoothing and rejuvenating action, it is particularly suitable for Body Exfoliation treatments.

ESSENTIAL OIL OF JUNIPER

016

This is used in the production of quality plant-based cosmetics. It is used in Stimulating and Toning products. It also boasts anti-inflammatory, relaxing, tension-relieving and antiseptic properties.

ESSENTIAL OIL OF MINT

210

This essence has toning and stimulating properties.

NATURAL SUNFLOWER OIL

58c - 59c

The composition of sunflower oil is simple: unsaturated fatty acids, approximately 32% oleic acid (monounsaturated) and 52% linoleic acid (polyunsaturated), precursors of the omega 3 and 6 fatty acids. One noble component highly present in sunflower oil is vitamin E, tocopherol. Its main benefit is that is an excellent antioxidant, present in sunflower oil in a quantity that is five times higher than that of olive oil, protecting the cell membranes and counteracting free radicals, also responsible for cell aging. To slow down photoaging, you can use sunflower oil directly on the skin, and as an ointment it will restore youth and softness.

PANTHENOI.

Hydrating, Protective. A pantothenic acid derivative (Vitamin B5). In the cosmetic field, Panthenol, by virtue of its outstanding moisturising, emollient and soothing effect, is the ingredient of choice in many cosmetic products for dry or irritated skin. In addition to its wellknown hydrating properties, Panthenol is also recommended for its emollient and soothing activity (for example to reduce erythema and dermatitis caused by extensive exposure to ultraviolet rays).

POLLEN

14v

A fine, sticky powder that fertilises flowers. It is therefore a characteristic element, a kind of genetic imprint that is different for each type of flower. Every single grain of pollen contains all of the elements necessary for life: proteins, vitamins, amino acids, fats, carbohydrates, enzymes, mineral salts and hormones, present in varying proportions, depending on which flower it comes from. Pollen is a true concentrate of protein, present to the order of 30% and consisting of all eight amino acids

QUARTZ POWDER

essential to man.

This has an immediate lifting and smoothing effect.

PRO VITAMIN B5

fi1 - fi2 - fi5

Extracted from liquorice, it boasts remarkable soothing and anti-inflammatory properties. Considered "natural cortisone", glycyrrhetinic acid inhibits Phospholipases A2 and the production of free radicals, obstructing at least two mechanisms essential to inflammatory phenomena, and is thus a powerful anti-inflammatory.

PROTEASES

Used to combat photo-aging, Proteases induce cell renewal, accelerating the chemical reactions that are triggered by the substances used for photo protection. The enzymes, which fight free radicals, causing cellular renewal, perform a biological peel without irritating the skin, a treatment that thoroughly cleanses and facilitates the absorption of active substances.

OAK EXTRACT

This extract is obtained from the roots of the oak and is rich in active ingredients to protect the skin, preventing damage from the sun, wind, dust and the elements. It is particularly suitable for malnourished, dehydrated and toneless skin.

GINSENG ROOT EXTRACT

42c - 45c - 46c - 47c

In the beauty industry, the antioxidising action of ginseng is very important. The extract is used as an essential ingredient in various cosmetics aimed at combating signs of aging. It has toning, hydrating, stimulating and revitalising properties, and helps to leave the skin brighter and more elastic, especially during stressful periods.

RETINOL

30v

An active ingredient in treatments to combat skin aging, pigment disorders and acne. It is often used in association with other active ingredients in photo-aging treatment in order to create synergy in the action mechanism, making it more effective.

DOG-ROSE EXTRACT

30v

In ancient times, the petals of the dog-rose were used to extract a precious oil. In cosmetics, the dog-rose is a plant widely used to produce scented water, anti-aging and anti-wrinkle creams, ointments to soothe sunburn, facial masks with a toning, smoothing and astringent action and particularly suitable for sensitive skin.

BUTCHER'S BROOM

8c - 9c - 19c

Butcher's broom extract is used in treatments for sensitive skin suffering from capillary fragility and couperose. Thanks to its properties with a beneficial effect on microcirculation, it is widely used in products for tired and heavy legs, suffering from venous insufficiency. Used in cosmetics designed to combat cellulite and reduce localized fat deposits.

SEA SALT

58c - 59c

This is mainly composed of sodium chloride, with lower percentages of calcium, magnesium, iodine, potassium and sulphur. Obtained through the natural evaporation of water, it enhances the product's properties with an osmosis action, carrying all the plant ingredients.

Excellent as a peeling mechanism.

HYALURONIC ACID SODIUM SALT (SODIUM HYALURONATE)

54

Hyaluronic acid is a fundamental component of our connective tissues and plays an important structural role in the skin alongside collagen and elastin. The main property of hyaluronic acid is that it binds a large number of water molecules, ensuring the hydration of the skin. Due to its high affinity for water, Hyaluronic Acid Sodium Salt (Sodium Hyaluronate) is used as a skin moisturiser. When applied to the skin it forms a fine layer which keeps the skin smooth and hydrated. Finally, the smaller molecules are able to penetrate into the subcutaneous layers giving firmness to the tissues and temporarily filling and smoothing small wrinkles.

DEAD SEA SALT

41c - 50c - 54c - 58c - 59c

The Dead Sea is the basin with the highest concentration of salt on the face of the earth, ten times the salinity of any other sea. This is due to the continuous evaporation of water (induced by dry weather conditions and the lack of tributaries), making the dissolved salt gradually more and more concentrated. Dead Sea salt contains 43 natural mineral salts crystallised over the course of decades on the shores of the Dead Sea with a high concentration of potassium, magnesium, sodium and bromine, making the product particularly suitable for treating cellulite and/or fat deposits.

SAGE 010-011-012-013

Sage leaves and flowers contain mainly essential oil but also substances including terpenes, tannins, flavonoids and phytosterols. In the cosmetic field it is used mainly on oily and impure skin due to its purifying, astringent, healing and antiseptic action.

ELDERBERRY EXTRACT

83v

Boasting anti-inflammatory and soothing properties, elderberry is ideal for the treatment of dermatitis, impure and sensitive skin. It helps to strengthen the skin's protective barrier, stabilising the lipid layer of the skin and making it soft and smooth. It also helps in skin decongestion procedures, and is recommended for dry skin due to its regenerative and nutritional properties.

SANGRE DE DRAGO EXTRACT

46c

A climbing plant originating from the Amazon, the seeds of which are used for their caffeine; it is one of the few plants, along with coffee, tea and cola, that contain this substance. Used in cosmetics for its lipolytic activity, essentially due to the high content of caffeine in the seeds. One of the main beneficial properties associated with guarana is its energising effect. As the caffeine in guarana is released into the body more slowly, its effects are more powerful and longer lasting than those of coffee.

GRAPE SEED EXTRACT

29v - 59v

A substitute for sweet almond oil, for external use, its properties mostly have a softening effect; the oil from the grape seeds protects the blood vessels, restoring elasticity to the skin (stabilising elastin and collagen). The Proanthocyanidins are especially present in the seeds of black grapes: these boast strong antioxidising properties.

"BOTOLIKE "BOTULIN SIMULATOR"

66v - 67v

Thanks to the special peptide molecule, which imitates the action mechanism of the botulinum toxin, Relaxis Botolike Concentrated Serum acts on the prevention and softening of expression wrinkles (*) with a marked effect on muscle relaxation and the release of neurotransmitters. (*) Expression wrinkles are a very widespread aesthetic issue, even among young people: these wrinkles are connected to facial mimicry and, so, to the repeated contraction of muscles, determining facial expressiveness. They are wrinkles, characterised by their reduced morphological expression when the face is relaxed, and occur most commonly in the areas around the lips and eyes and on the forehead. In the medical field, currently, injections of botulinum toxin, a protein produced by the bacterium Clostridium Botulinum, are currently being used with success. This toxin acts on the neuromuscular junction, inhibiting the release of neurotransmitters and, accordingly, muscle contraction, which leads to skin relaxation, but it does have side effects. In the skincare field, "Botolike products" have been formulated - products, containing active substances, which relax the muscles, preventing and reducing the thin expression wrinkles. They are molecules for cosmetic use, in particular proteins with low molecular weight, made up of 4, 5, maximum 6 amino acids, which, owing to their chemical composition, manage to penetrate into the dermis. These peptides perform a "botulin-like" action: that is, they act on the subcutaneous muscles, reducing their contraction rate and determining skin stretching, on the outside. In this way, wrinkles are reduced and facial features are more relaxed and balanced.

SODIUM DNA

69v

Anti-Aging, Super-hydrating, Repairing, Elasticising, Re-epithelising. Contrasts the signs of aging, protecting against stress and internal and external aggression, and helping to restore skin elasticity.

TAMARIND EXTRACT

55v - 56v

The Tamarind - Tamarindus indica, from the Leguminose Caesalpiniaceae Family - is an evergreen tree typical of tropical Africa, but also cultivated in India and America. Up to 25 metres high, it has been known since the dawn of time for its light-coloured legumes, similar to carobs. It is a concentrated solution of branched heteropolysaccharides and xyloglucans. In plants, xyloglucans play an important role in controlling cell growth, cellular regulation and tissue differentiation and in protecting the plant against invasion by pathogenic microorganisms. There are many benefits to the skin, such as protection against free radicals and anti-aging properties, and Tamarind is also a skin regenerator and a moisturiser.

ZINC SURFACTANT

79v

"Gently" cleanses the skin, with astringent, antibacterial and protective action.

TETRAPEPTIDE

fi4

This improves skin elasticity and smoothness, and has a strong refreshing effect. It mainly acts on the appearance of bags under the eyes, helping to restore the normal flow of fluid in the skin.

THYME

49c - O10 - O12

Thyme boasts balsam, antiseptic and analgesic properties. It is used in the formulation of preparations for the treatment of wounds and bruises, thanks also to the intrinsic antiseptic action.

VITAMIN A

12v - 13v - 62v

Acts on the **cutis** through various mechanisms, stimulating certain specific enzymes, some of which perform the role of improving the thickness of the skin, thus reducing the depth of the wrinkle and improving **skin hydration**.

Meanwhile, vitamin A acts on the **dermal** layer, resulting in an increase in collagen production, and the subsequent improvement of the "support structure" which helps to tone and elasticise the skin.

VITAMIN C

89v

Anti-oxidant, brightening and skin-protecting powers. These characteristics, when used in innovative, latest-generation skincare, aim to delay the onset of photo-ageing.

- it fights against the action of free radicals;
- it attenuates or prevents the formation of wrinkles;
- it counters the loss of skin tone;
- it masks skin spots and other imperfections;
- it acts on the skin's deepest layers;
- it moisturises the skin;
- it stimulates cell renewal;
- it helps maintain the skin's youthful aspect in the long term.

On the skin, vitamin C acts like a shield, effectively protecting it from the effects of the external environment. In cosmetic science, skincare products with vitamin C perform important functions for the skin:

- they are effective anti-oxidants; therefore, they act against photo/time-related ageing, protecting the skin from the damage caused by the free radicals produced by the sun and pollution;
- they take powerful action against wrinkles;
- they are effective lightening products, i.e. they act by making dark spots on the skin less visible.

VITAMIN E

3v - 46v - 62v - 63v - fi1 - fi2 - st4 - st5 - 25c - 26c - 38c - 39c - 40c - 202c

Used as an active ingredient in cosmetics to combat the action of free radicals on the skin and to slow down cell aging. Improves the condition of the surface of the skin. Acts to protect lipids and helps to keep the hydration of the skin well balanced. It has a protective and defensive action on the skin during the aging process and against harmful environmental factors.

VITAMIN F

14v - 23v - 24v - 62v

A natural compound also present in our body, especially in the joints. Glucosamine is necessary for the production of an important family of macromolecules called glycosaminoglycans, the basic ingredients of cartilage. It is also essential for the formation of connective tissue, contributing to the synthesis of new fibres to increase tissue elasticity and consistency.

VITAMINS, ESSENTIAL AMINO ACIDS AND OTHER PROTEINS

30v - 33v

These substances promote peripheral blood supply and "oxygenate the skin", assuring the supply of nutrients and maintaining skin hydration. Vitamins also play an antioxidant and healing role. For all these reasons, they have multiple cosmetic roles, and are also used in anti-wrinkle treatments and for expression marks, skin scars, stretch marks, skin blemishes, acne marks, dehydration and skin redness.

YLANG-YLANG

09 - 015

Renowned for its skin moisturising and antioxidant properties, Ylang-Ylang essential oil is ideal for wrinkles and stretch marks as well as oily and dry skin. It is used in aromatherapy because it dissolves both mental and physical tension, and is also an aphrodisiac. It is known as the essential oil of serenity and psychological wellbeing. The essential oil is particularly recommended for "relaxing, unwinding, calming, dissolving and unlocking" the body, muscles, anxieties, tension and stress: it is no coincidence that Ylang-Ylang oil is commonly used as a massage oil.

ZANTHALENE

fi1 - fi2 - fi3 - fi4 - fi5

This is an extract obtained from the fruit husks of Zanthoxylum bungeanum, a perennial plant originating from China, used for thousands of years to relieve itching and painful skin and in the form of extract in cosmetic products with soothing properties.

The main ingredient of the extract acts as a muscle relaxant. It works by relaxing the muscles on the surface of the skin, resulting in a powerful wrinkle-correction effect. It also soothes the skin and relieves itching.

ZINK OXIDE

79v

Protective, Absorbent, Calming, Antiseptic. Successfully employed in products which reduce redness, anti-acne treatments, as a base in makeup products and as a sun filter.

It is particularly suitable for:

- acne-prone skin, eczema
- irritated, reddened or inflamed skin
- delicate skin (also in children).

PAGE	Р	RODUCT	EAN	ACTIVE INGREDIENTS AND THEIR FUNCTION	CHARACTERISTICS	TREATMENT
05		3V CLEANSING MILK 250 ml CB1001003V € 14.60	8 000836 380316	Sweet almond oil: has nourishing and softening properties, leaving the skin soft and velvety. Excellent decongesting action on irritated skin. Specifically for couperose and rosacea-prone skin. Vitamins: antioxidant, anti-aging.	Soft and gentle, cleanses thoroughly, removing all trace of make-up from the skin. Retains the natural ph with a decongesting effect. Specifically for skin prone to couperose or rosacea.	Cleaning the face - Cleansing
05		4V DUAL-PHASE EYE AND ILP MAKE-UP REMOVER 1.50 ml CB1001004V € 14.60	8 000836 380323	Avena Sativa: moisturizing, softening and anti-irritant, decongesting. Distilled Witch Hazel Extract: soothing, decongestant.	Quickly removes all trace of make-up, even when waterproof. Moisturising, softening and anti-irritant. Also for sensitive eyes.	Cleaning the face - Cleansing
07		6V BALANCING TONER 250 ml CB1001006V € 12.30	8 000836 380163	Hyaluronic acid: strong hydrating action, holds large amounts of water, preventing it from flowing away. Witch hazel: soothing, protects blood vessels. Blueberry: protects the capillary walls, an excellent antioxidant.	Restores balance to the hydrolipid film of the skin after cleansing.	Cleaning the face - Cleansing
08		12V INTENSIVE HYDRATING TREATMENT 250 ml CB1001012V € 22.60	8 000836 380002	Hyaluronic acid: strong hydrating action, holds water. Vitamin A: (retinol) anti-oxidizing action. Avocado oil: rich in vitamins, with softening, protective and nourishing properties. UV filters.	Restores and maintains the right balance for the hydrolipid film of the skin, protective action, preventing the appearance of the first expression lines. Hydrates and softens. Suitable for very dehydrated skin and cold climates.	Face hydration
08		13V INTENSIVE HYDRATING DAY CREAM 50 ml CB1001013V € 21.00	8 000836 380019	Hyaluronic acid: strong hydrating action, holds water Vitamin A: (Retinol) antioxidising action Avocado oil: rich in vitamins, with softening, protective and nourishing properties. UV filters.	Restores and maintains the right balance for the hydrolipid film of the skin, protective action, preventing the appearance of the first expression lines. Hydrates and softens. Suitable for very dehydrated skin and cold climates.	Face hydration
08		14V DEEP ACTION ULTRA HYDRATION AND ELASTICISING CONCENTRATE FOR THE FACE 250 ml CB1001014V € 20.20	8 000836 380149	Vitamin F: keeps the skin healthy Hyaluronic acid: strong hydrating action, holds water Elastin: a protein that gives elasticity, keeps collagen fibres hydrated, leaving the skin soft and smooth Pollen: nourishes and vitalises the skin, hydrating and anti-wrinkle action	Deep action ultra hydrating concentrate. Energising and anti-aging action, leaving the skin soft, firm and velvety.	Face hydration
10		16V HYDRATING MASK 250 ml CB1001016V € 24.50	8 000836 380491	Shea butter: has a high content of unsaponifiables, substances essential for improved toning, healing, softening, soothing, hydrating and regenerating Hyaluronic acid: strong hydrating action, holds water. N.M.F.: deep-down hydration, humectant.	Hydrates and nourishes the skin, leaving it firm, relaxed and bright.	Face hydration
10		18V EYE CONTOUR REJUVENATING CREAM 15 ml CB1001018V € 15.40	8 000836 380132	Hyaluronic acid: strong hydrating action, holds water. Alpha-bisabolol: effective action against free radicals, prevents damage to cell membranes caused by oxidation. Plant extracts.	Reduces bags and dark circles under the eyes. Anti-aging action against free radicals.	Eye contour and lifting
10		23V TREATMENT FOR IMPURE SKIN 250 ml CB1001023V € 26.70	8 000836 380286	Iris: anti-inflammatory, astringent and decongesting action. Vitamin F: essential for keeping the skin healthy. Trace elements: reactivate cell functions.	Perform a specific antiseptic, decongesting and sebum-regulating action. Antioxidising and regenerative. With solar filters.	Impure skin - Purifying
10		24V TREATMENT FOR IMPURE SKIN 50 ml CB1001024V € 19.50	8 000836 380071	Iris: anti-inflammatory, astringent and decongesting action. Vitamin F: essential for keeping the skin healthy. Trace elements: reactivate cell functions.	Perform a specific antiseptic, decongesting and sebum-regulating action. Antioxidising and regenerative. With solar filters.	Impure skin - Purifying
11		29V ANTI-AGING DAY CREAM 50 ML CB1001029V € 20.90	8 000836 380538	Grape seed: combats free radicals, smooths, hydrates, nourishes. Illuminating pigments: consisting of talc, titanium dioxide, aluminium and silicon with significant reflective properties.	Combats skin aging, acting against the forma- tion of free radicals, leaving the skin elastic and bright. Non-comedogenic. Deep and long-lasting hydration: prevents the appearance of expression lines.	Anti-aging
12		30V ANTI-AGING NIGHT CREAM 50 ml CB1001030V € 18.40	8 000836 380545	Retinol: vitamin a antioxidant Vitamins: increase hydration in the stratum corneum, increased skin renewal. Antioxidant, anti-free radical. Dog-rose: soothing astringent action.	Combats skin aging, regenerates the cutis, tones the skin and restores its elasticity; combats the formation of wrinkles. Restores balance to the hydrolipid film of the skin after cleansing.	Anti-aging

Restores the normal structure of the epidermis, strengthens the skin, leaving it soft and smooth. Softening, nourishing properties.	Anti-aging - Face hydration
14	0	46V ANTI-AGING MASK 250 ml CB1001046V € 19.90	8 000836 381054	Macadamia oil: essential due to its properties similar to sebum, restoring balance to the secretion of lipids from aging skin and restoring the right level of hydration to dry and dehydrated skin. Vitamin E: increases hydration of the outermost layer of the skin, increasing skin renewal.	Anti-aging cream mask. Fully revitalises the epidermis, leaving it soft and smooth; reduces skin aging due to the hydrating and antioxidising active ingredients.	Anti-aging
14		55V DAY CREAM FOR HYPERSENSITIVE SKIN 250 ml CB1001055V € 29.70	8 1000836 381009	Bran Oil: emollient and protective. Tamarind Extract: anti-free radical, anti-aging, hydrating.	Protective, for sensitive skin. A pure concentrate of functional substances suitable for protecting and hydrating sensitive and delicate skin, as well as skin prone to redness.	Ultrasensitive skin
14		56V DAY CREAM FOR HYPERSENSITIVE SKIN 50 ml CB1001056V € 19.80	8 000836 381016	Bran Oil: emollient and protective. Tamarind Extract: anti-free radical, anti-aging, hydrating.	Protective, for sensitive skin. A pure concentrate of functional substances suitable for protecting and hydrating sensitive and delicate skin, as well as skin prone to redness.	Ultrasensitive skin
15		59V ANTI-AGING DAY CREAM 250 ml CB1001059V € 29.90	8 000836 381047	Grape seed: combats free radicals, smooths, hydrates, nourishes. Illuminating pigments: consisting of talc, titanium dioxide, aluminium and silicon with significant reflecting properties.	Combats skin aging, acting against the formation of free radicals, restoring elasticity and brightness to the skin. Non-comedogenic. Deep and long-lasting hydration: prevents the appearance of expression lines.	Anti-aging
16		60V EXFOLIANT WITH SAILCYLIC ACID 100 ml CB1001060V € 13.60	8 000836 382020	Extracts of oak, chamomile and essential oils of lavender: Removal of dead cells, deep cleansing. Stimulates, promotes cell turnover and restores balance to the skin. Salicylic Acid: removal of dead surface cells.	Prepares the epidermis for subsequent treatments, increasing their effect. Leaves the skin looking bright.	Cleaning the face - Cleansing
17		62V FACE SERUM MULTIVITAMIN 12x3 ml CB1001062V € 48.60	8 000836 382099	Lipoic Acid: anti-aging, anti-free radical. Vitamin A: hydration, increases collagen production. Vitamin E: anti-free radical, anti-aging, protection. Argan Oil: hydrating, anti-free radical.	Antioxidant, anti-aging. Hydrates and nourishes the skin deep down.	Anti-aging - Face hydration
17	Ō	63V FACE SERUM HYALURONIC ACID 12x3 ml CB1001063V € 48.60	8 000836 382105	High Molecular Weight Hyaluronic Acid: hydrates the skin at the surface. Low Molecular Weight Hyaluronic Acid: hydrates the skin deep down. Vitamin E: anti-free radical, anti-aging, protection.	Hydrating and emollient. Recommended for wrinkle reduction. Anti-aging, nourishing.	Anti-aging - Face hydration
18		64V BIOSPHERIX 9X FACE CREAM 50 ml CB1001064V € 43.80	8 000836 382167	Low Molecular Weight Hyaluronic Acid: hydrates the skin deep down, fills wrinkles from the inside. High Molecular Weight Hyaluronic Acid: hydrates the skin at the surface. 9X Biospheres: retain the active ingredients, creeping into the wrinkles and increasing their volume by 9 times (9X).	Filler - Anti-aging — Super-hydrating.	Anti-aging - Face hydration - Wrinkle filler
18		65V SNAIL SECRETION FACE CREAM 50 ml CB1001065V € 54.40	8 000836 382174	Allantoin: hydrating, soothing, re-epithelising, protective. Elastin: increases skin elasticity. Collagen: hydrating, softening; for skin which is toned and soft. Glycolic Acid: exfoliating, stimulates new collagen formation, for more luminous skin. Vitamins, essential amino acids and proteins: increases skin oxygenation, ensuring nourishment and hydration. Antioxidant, healing. Reduces wrinkles, expression lines, skin blemishes, signs of acne and redness.	Anti-aging, restructuring: stretching effect, nourishing, rejuvenating, exfoliating, purifying, hydrating, antioxidant. 50% Concentration	Anti-aging - Face hydration - Purifying - Nourishing
19		66V CONCENTRATED R ELAXIS FACE SERUM 30 ml CB1001066V € 33.90	8 000836 382181	Botolike "Botulin Simulator": prevents and reduces expression wrinkles by relaxing the subcutaneous muscle fascia. For calmer, more relaxed skin.	Instant effect. Anti-aging, firming and smoothing wrinkles, lifting effect.	Anti-aging - Smoothing Wrinkles - Lifting
19		67V RELAXIS FACE CREAM 50 ml CB1001067V € 39.70	8 000836 382198	Botolike "Botulin Simulator": prevents and reduces expression wrinkles by relaxing the subcutaneous muscle fascia. For calmer, more relaxed skin.	Long-lasting effect. Anti-aging, firming and smoothing wrinkles, lifting effect.	Anti-aging - Smoothing Wrinkles - Lifting
